## **Building Budget Brits** Haynes Manuals

1945 to 1955 (and later?) Models: An illustrated workshop manual covering Triumph twin-cylinder motorcycles from 1945 to 1955: This is a faithful reproduction of the Factory Workshop Manual No. 11, originally published in the US by Floyd Clymer. The major revision in the later pre-unit factory manuals was the addition of technical specifications for the T120 Bonneville (1959). Unfortunately, those revisions also included the deletion of repair data for rigid frame, sprung hub and 3T models. This makes the Factory Workshop Manual No. 11 the most comprehensive workshop manual available for pre-unit, twin-cylinder Triumph motorcycles up to and including 1962 models as it includes repair and maintenance data for the full line of rigid frame, sprung hub, swing-arm and 350cc models. Much more detailed than the owner's handbook, this manual provides the information necessary for the overhaul of engines, gear boxes, frames, swing-arm, forks, wheels, hubs, carburetors, electrics, etc., essential information for the enthusiast, owner or restorer of these classic motorcycles. Size: 5.5" x 8.5" with 224 pages and 84 illustrations, includes 8 pages of detailed technical specification charts and both an illustration index and a comprehensive index of contents. Applicable to the following models: 5T Speed Twin, T100 Tiger 100, TR5 Trophy, 6T Thunderbird, T110 Tiger 110 and 3T De-Luxe. Includes maintenance and repair data for the following engines: Twin Cylinder 350cc OHV, 500cc OHV and 650cc OHV.

Yamaha FJR1300, '01 To '13 Haynes Publishing

210 pages and more than 220 illustrations and charts, size 8.25 x  
10.75 inches. This publication is a reproduction of the January  
1972 Triumph factory workshop manual part number 99-0947. This  
manual is applicable to all 650cc oil-in-frame UK, General Export  
and USA models including the T120R, TR6R, TR6C, T120RV, TR6RV and  
TR6CV manufactured between October 1970 and September 1973. It is  
generally accepted that 1971 through 1973 are the appropriate  
model years for the 650cc oil-in-frame machines. However, in  
September 1973 the Triumph employees barricaded the factory gates  
and began an 18 month 'sit in' effectively managing the company  
as a co-operative. During that 18 month period there were some  
T120RV models assembled and released. However, the remainder did  
not leave the factory until the 'sit-in' ended in 1975.

Consequently, the actual production run for the T120RV can be  
considered to be from 1971 to 1975. While many of the mechanical  
components were shared with the earlier 650cc twins the  
introduction of the oil-in-frame models required the publication  
of a 'revised' factory workshop manual that covered both the new  
electrical and mechanical components and the five-speed models  
that were introduced in 1972. Consequently, owners of the late  
model 650cc machines are subjected to considerable confusion  
surrounding the appropriate selection of the multitude of  
originals and reprints of the various 650cc manuals that have  
recently flooded the marketplace. We encourage you to exercise  
caution when purchasing a manual for your motorcycle or  
automobile as many of the reprints found on internet websites are  
from 'bedroom sellers' at enticingly low prices by individuals  
that really have no idea what they are selling. Many are nothing  
more than poor quality comb-bound photocopies that are scanned  
and printed complete with greasy pages and thumbprints and, as  
such, are deceptively described as 'pre-owned', 'used' or even  
'refurbished'. In addition, they are often advertised for the  
incorrect series and/or model years. While the oil-in-frame  
models are easily identified, owners of those models are  
encouraged to verify that the workshop manual is appropriate for  
their machine. A quick check of the engine number is the most  
accurate method.
