Battle for the Beetle
Brooklands Books
Since the early 2000s,
the apparent explosion
of interest in
Volkswagens with
original paint, rust
and patina has
inspired a generation
of car fanatics, who
might not be able to
afford to restore a
car to show condition,
but still want a good
looking, cool car that
will stand out from
the crowd. Once looked
upon as being in need
of restoration, cars
with original paint,

rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why; these cars are rare, unspoiled survivors - cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles

of build, meaning every single car has a style all its own. Foreword by Drew Pritchard of TV's 'Salvage Hunters' fame.

Ludvigsen traces the history of the Volkswagen Beetle, from its inception as a people's car for Hitler's Germany to its status as a beloved American icon, to the arrival of the New Beetle in 1998.
