This last volume of the Energy in World Agriculture series is in many ways the series' Alpha and its Omega. It addresses the broad issues related to the use of energy in agricultural production, and also characterizes and quantifies the energy involvements of many agricultural production technologies. It is a compilation of descriptive and analytical information and design principles and data of energy use in this field. A

significant aspect is the relationship between energy and agricultural productivity, increased knowledge and resulting improved management of energy-consuming operations on the farm. Information provided here has not been published elsewhere before. Throughout the book are examples of the important role that energy inputs have played in increasing productivity of the world's agricultural systems. Together with a revived interest in energy for agricultural production due to increases in energy costs, this volume meets that interest with valuable information and insights.

TW Index is a complete and detailed index of everything that has appeared in the SDC Turning Wheels magazine since its inception in 1972. Of greatest importance are the advice items that are indexed by subject

(engines, brakes, steering, etc.), model AND year including all individual letters that appear in the Co-Operator column. Historical items are also indexed by subject as well as by the vehicle (model and year) they relate to. If you own, for instance, a 1959 Hawk, TW Index will give you instant access to everything that has been published about your car and much more. Each listing, of course, refers you to the specific issue of "Turning Wheels" and cites the page on which the item begins. Rated "excellent" by Fred Fox and Bob Palma. Volume 1 of Turning Wheels Index includes issues of Turning Wheels from 1972 through 1992 with 10,711 references on 159 pages. Volume 2 includes 1993 through 2009 with 9,995 references on 158 pages.
