The progression of American
fire apparatus since the
romantic horse-drawn era has
truly been amazing. The
elementary steam engines and
wagons of yesteryear have
evolved into a multitude of
technologically advanced
modern rigs to mitigate the
hazards of the 21st Century as
efficiently and safely as
possible. The roles of today's
fire services have expanded to
include Emergency Medical
Services, Hazardous Materials,
Urban Search & Rescue, and
Wildland. These modern
disciplines required a new
breed of specialty apparatus
and even the classic fire truck
has transformed into multi-
purpose rescue-pumpers,
pumper-tankers, and an array
of aerial trucks. An industry
long dominated by legendary
names is led by a new
generation that includes Pierce,
KME, E-One, Rosenbauer,
Ferrara, and many others. This
volume highlights fire trucks
from 1980 to present, the
culmination of the 20th
Century into a new
Millennium.

Super Truck Capstone

While fully custom rigs have
traditionally been the pin-ups
of fire apparatus, the backbone
of the American fire service

has always been trucks built on
commercially available chassis.
Although there have been many
commercial chassis providers
throughout history, there is
arguably no more recognizable
name in the American
automotive industry than Ford.
This book serves as a pictorial
history of the role Ford chassis
have played in the evolution of
fire apparatus. Fire trucks of all
types built on the famous
Model T, the long standing F-
Series, the venerable C-Series,
the honorary Louisville-Line,
and other miscellaneous Ford
models have prolifically and
efficiently served towns small
and big alike since the advent
of motorization. This chronicle
pays homage to the
contributions this automotive
legend has made to the fire
service with a brilliant display
of classic rigs and modern
machines, with representatives
from over 150 fire apparatus
manufacturers – from the
glamour queens themselves to
smaller builders with
characteristics just as neat as
their big name peers.

Fire Trucks of the 1950s

ABDO Publishing Company

Fire trucks are fast, loud, and big rescue machines. These vehicles rush to the scene of a fire, bringing firefighters along to help put out a blaze and help rescue people in their time of need. But there

are many different kinds of fire trucks. From the ladder trucks firefighters use to reach high floors on buildings to the fire engines used to toss lots of water on a blaze, each fire truck is unique. Beginning readers will love exploring these important vehicles and learning how they help people when fire strikes.
