Children of Yesterday: The 24th Infantry Division in the Philippines, by Jan Valtin (the pseudonym of Richard Krebs) and first published in 1946, is the story of the

U.S. Army's 24th Infantry Division during its deployment to the Philippines in 1944-45. The Division took part in fierce fighting on Mindanao, Leyte, Mindoro, Luzon, and Corregidor. Children of Yesterday portrays the horrors of the often close-quarters combat in graphic detail, while also accurately portraying the bravery and camaraderie of American troops, and remains one of the best accounts of the war in the Pacific from the perspective of the front-line infantryman.

While fully custom rigs have traditionally
been the pin-ups of fire apparatus, the
backbone of the American fire service
has always been trucks built on
commercially available chassis.
Although there have been many
commercial chassis providers
throughout history, there is arguably no
more recognizable name in the
American automotive industry than
Ford. This book serves as a pictorial
history of the role Ford chassis have
played in the evolution of fire apparatus.
Fire trucks of all types built on the
famous Model T, the long standing F-
Series, the venerable C-Series, the

honorary Louisville-Line, and other miscellaneous Ford models have prolifically and efficiently served towns small and big alike since the advent of motorization. This chronicle pays homage to the contributions this automotive legend has made to the fire service with a brilliant display of classic rigs and modern machines, with representatives from over 150 fire apparatus manufacturers – from the glamour queens themselves to smaller builders with characteristics just as neat as their big name peers.

Portland Speedway, also known as Union Avenue Speedway, opened in the summer of 1936 and enjoyed a 66-year run as the leading oval track in Portland. Originally built as a dirt track on a farmer's field in the far north of the city, the track was known for track roadsters based on Ford's Model T,

sprint cars, and stock cars. As returning servicemen discovered a love for racing, the track exploded in popularity after World War II. The track was paved in 1946 and flourished as a center for racing; it even included a drive-in movie theater. Many notable racers, such as Len Sutton, Rolla Vollstedt, Greg Biffle, and Mike Bliss, either started their careers at or visited Portland Speedway. But the real story of Portland Speedway is told in the hundreds of people who made a living or simply enjoyed the racing life while competing at the Pacific Northwest's finest track."

A wealth of information on the wildlife, stories and history of the islands. For those wishing to visit in small boats or kayaks there are details of: Landings? Camping? Drinking water? Tidal information Oileain is a detailed guide to almost every Irish offshore island. The guide is comprehensive, describing over 300 islands, big and small, far out to sea and close in by the shore,

inhabited and uninhabited. Oileain tells it as it is, rock by rock, good and bad, pleasant and otherwise. It concentrates on landings and access generally, then adds information on camping, drinking water, tides, history, climbing, birds, whales, dolphins, legends or anything else of interest. Oileain will, I hope, appeal to all who go to sea in small boats, divers and yachtsmen as well as kayakers. The sheer level of detail contained in Oileain must surely throw new light on places they thought they knew well. It is not a book about kayaking. It so happens that a practical way of getting to islands is by kayak, and that is how the author gets about. Scuba divers and RIBs get in close too. Yachtsmen get about better than most, and they too enjoy exploring intensively from a dinghy. With the increasing availability of ferries, boatless people will also enjoy Oileain. Offshore islands are the last wilderness in Ireland. Hillwaking is now so popular that there are few untrampled mainland hills. Ninety per cent of offshore islands are uninhabited outside

of the first fortnight in August, and eighty per cent even then. You won't meet many other people, if any at all, out beyond an Irish surf line. It is a time of change though, and holiday homes are very much the coming thing in some offshore areas. Sea going will never stop being a great adventure. Therefore, offshore islands are still the preserve of the very few. Now is a golden era for exploration.
