****SOON TO BE A TV SERIES STARRING CHRIS PRATT**** 'Carr writes both from the gut and a seemingly infinite reservoir of knowledge in the methods of human combat. Loved it!' Chris Hauty, bestselling author of *Deep State* *Deep in the wilds of Siberia*, a woman is on the run, pursued by a man harboring secrets – a man intent on killing her. Half a world away, James Reece is recovering from brain surgery in the Montana

wilderness, slowly putting his life back together with the help of investigative journalist Katie Buranek and his longtime friend and SEAL teammate Raife Hastings. Unbeknown to them, the Russian mafia has set their sights on Reece in a deadly game of cat and mouse. In his most visceral and heart-pounding thriller yet, Jack Carr explores the darkest instincts of humanity through the eyes of a man who has seen both the best and the worst of it. Praise for Jack Carr: 'This is seriously good . . . the suspense is unrelenting, and the tradecraft is so authentic the government will probably ban it – so read it while you can!' Lee Child 'With a particular line in authentic tradecraft, this fabulously unrelenting thrill-ride was a struggle to put down' Mark

Dawson 'Gritty, raw and brilliant!' Tom Marcus ' So powerful, so pulse-pounding, so well-written – rarely do you read a debut novel this damn good ' Brad Thor 'A powerful, thoughtful, realistic, at times terrifying thriller that I could not put down. A terrific addition to the genre, Jack Carr and his alter-ego protagonist, James Reece, continue to blow me away' Mark Greaney 'Thrilling' Publishers Weekly

A comprehensive, richly illustrated appraisal of the life of this automotive design giant. Few automotive designers have as impressive a resume as Tom Tjaarda. Among automotive enthusiasts, his name is synonymous with the De Tomaso, Ferrari, Fiat, Ford,

Innocenti, and Lancia marques, but he also is responsible for the successful workaday Ford Fiesta. Raised in Detroit when the American Dream was beating out its rock 'n' roll rhythm, Tjaarda moved to Europe, where he had a ringside seat at the heart of automotive styling activities in the Mecca of vehicle design, Turin, in its heyday. The lessons he learned there helped make him one of the most influential and important designers of the second half of the twentieth century. Tom Tjaarda: Master of Proportions is a comprehensive, richly illustrated appraisal of the life of this design giant, featuring all his designs, both automotive and in other fields.

Dave McLellan belongs to a select group by having been the second of only three Corvette Chief Engineers to date. He is also the very first Corvette Chief Engineer to sit down and write his view of the incredible story of America's foremost sports car. In *Corvette from the Inside* Dave McLellan talks about his years at the center of Corvette Engineering, his take on Corvette history and many of the details that have made the Corvette a perennial favorite with millions of Americans. As McLellan describes the incredible highs and lows in the life of the Corvette, he also paints the bigger picture of the American auto industry's ability to rebuild itself whenever its survival is threatened. McLellan uses every tool at his disposal to tell his story, including original sketches and charts drawn by him exclusively for this book,

scores of archival photos from GM, photos from his personal collection, and of course his own first-hand memories of 32 years at General Motors. How to Build High-Performance Chevy LS1/LS6 V-8s Amos Hobby Publishing Company

The C3 Corvette's swooping fenders and unmistakable body style capture the imagination and make it an enduring classic. About a half-million Corvettes were sold between 1968 and 1982, and the unique combination of Shark style, handling, and V-8 performance is revered. Some early C3s, built between 1968 and 1974, are simply too rare and valuable to be modified, particularly the big-block cars. The later Corvettes, built from 1975 to 1982, came with low-compression engines that produced anemic performance. The vast majority of these Corvettes are affordable, plentiful, and the ideal platform for a high-

performance build. Corvette expert, high-performance shop owner, and builder Chris Petris shows how to transform a mundane C3 into an outstanding high-performance car. Stock Corvettes of this generation carry antiquated brakes, steering, suspension, and anemic V-8 engines with 165 to 220 hp. He covers the installation of top-quality aftermarket suspension components, LS crate engines, big brakes, frame upgrades, and improved driveline parts. The book also includes popular upgrades to every component group, including engine, transmission, differential, suspension, steering, chassis, electrical system, interior, tires, wheels, and more. Whether you are mildly modifying your Corvette for greater comfort and driveability or substantially modifying it for vastly improved acceleration, braking, and handling, this book has insightful instruction to help you reach your goals. No other book provides as

many popular how-to projects to comprehensively transform the C3 Corvette into a 21st-century sports car.
