Are you often stressed, anxious and overwhelmed? Does the strain of daily life stretch you so thin that at the end of the day, you're exhausted and spent? Are you doing all the right things--yoga, meditation, breathing--yet calm still evades you? Turns out, you're not alone. Dr. Christian Reichardt has helped thousands of patients over the last 35 years overcome stress, as well as the physical ailments that come along with such a frame of mind. Now he's written a book to help you do the same. Beginning with an explanation of the brain's evolution and how the development of our survival instincts have made modern living so challenging, he offers a way to deal with it. You'll be told to ask yourself some questions, and to write down your answers to generate a list. This list becomes your personal guide towards a calmer, happier and healthier life! Containing tales of real people interpolated with a bit of neuro-science and evolutionary background information, the lesson becomes simple: by taking better care of yourself and having just a bit of patience, over time, you'll begin to see results. The life you want to create is within reach, and this book teaches you how to get it. It gives you simple tools for finally becoming the person you already know you can be.

Appealing to everyone from college-level majors to independent learners, *The Art and Craft of Problem Solving*, 3rd Edition introduces a problem-solving approach to mathematics, as opposed to the traditional exercises approach. The goal of *The Art and Craft of Problem Solving* is to develop strong problem solving skills, which it achieves by encouraging students to do math rather than just study it. Paul Zeitz draws upon his experience as a coach for the international mathematics Olympiad to give students an enhanced sense of mathematics and the ability to investigate and solve problems.

Built on a strong foundation, *Basic Marketing 18e* with ConnectPlus and LearnSmart provides an integrated teaching and learning solution for presenting the four Ps framework and managerial orientation with a strategy planning focus. The Perreault franchise was the pioneer of the "four Ps" in the introductory marketing course. The unifying focus of *Basic Marketing* has always been on how to make marketing decisions in deciding what customers to focus on and how best to meet their needs. Consistent with our belief in continuous quality improvement, this edition has been critically revised, updated, and rewritten to reflect new concepts, new examples, recent "best practices," and to tightly integrate the best digital tools in the industry for ensuring that students are prepared to engage in classroom lectures and pursue future business and marketing careers.

An essential volume in the NASA History Series by Robert C. Seamans, Jr., the Associate Administrator of NASA during the Apollo program. A stirring insider's account of NASA and the manned space program at the highest levels. Relationships with the Department of Defense, the Apollo 204 fire, the assassination of President Kennedy, and more. *Aiming at Targets* is a series of fascinating topical vignettes covering the author's professional life. Taken together, like broad brushstrokes in an impressionist painting, they give a better picture of Bob Seamans and his work than a detailed recitation of facts and dates could hope to do. This is a cheerful account of an interesting and successful career. The book is full of good stories, with many memorable characters. Like the proverbial sundial, it counts the sunny hours.

The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.

This Handbook reviews a wealth of research in cognitive and educational psychology that investigates how to enhance learning and instruction to aid students struggling to learn and to advise teachers on how best to support student learning. The Handbook includes features that inform readers about how to improve instruction and student achievement based on scientific evidence across different domains, including science, mathematics, reading and writing. Each chapter supplies a description of the learning goal, a balanced presentation of the current evidence about the efficacy of various approaches to obtaining that learning goal, and a discussion of important future directions for research in this area. It is the ideal resource for researchers continuing their study of this field or for those only now beginning to explore how to improve student achievement.

Regardless of whether you are just contemplating a Balanced Scorecard, require assistance in linking their current Scorecard to management processes, or need a review of their past measurement efforts, *Balanced Scorecard Step by Step* provides detailed advice and proven solutions.

The Plural Society in the British West Indies Zondervan Sporting Kansas City captain Matt Besler has achieved something extraordinary in the least extraordinary way. At every level of his athletic career, Besler has heard the same questions and initial dismissal of his talent. Even as he made his slow, steady progression into the consciousness of his coaches, opponents, and fans, then onto the national and world soccer stage, he heard it still. How does a normal guy like Matt Besler end up playing in the World Cup, one of the most exclusive competitions in international sports? If it's true that he's a rather typical Midwestern guy, it's also true that Matt happens to be one of the best soccer players in the country. Professional soccer is a bastion for the flamboyant—the lifestyles, the hairstyles, the WAGs, the passionate fans—yet Matt has flourished as the anti-flamboyant. He is preternaturally calm.

He is stalwart. He is relentlessly committed to his preparedness and his athletic success. Matt Besler may seem to be Mr.

Average, but it is this very characteristic that has made him exceptional. No Other Home offers an honest, first-person perspective into exactly what it takes to reach the highest levels of the sporting world. Matt shares his stories—from growing up in a loving but fiercely competitive family, to climbing through the ranks of high school, club, and college athletics, to dealing with injuries and professional setbacks, and even to his own rather extraordinary experience of becoming a father. The poignant lessons he's learned so far hold value for soccer fans and nonfans alike. This is a book to be shared among family members, young and old. And for parents looking for positive influences in professional athletics, they will find no better role model than Matt. A portion of the proceeds from the sale of this book will be donated to the nonprofit charity, the BESLER FAMILY FOUNDATION.

*University Physics* is designed for the two- or three-semester calculus-based physics course. The text has been developed to meet the scope and sequence of most university physics courses and provides a foundation for a career in mathematics, science, or engineering. The book provides an important opportunity for students to learn the core concepts of physics and understand how those concepts apply to their lives and to the world around them. Due to the comprehensive nature of the material, we are offering the book in three volumes for flexibility and efficiency. Coverage and Scope Our *University Physics* textbook adheres to the scope and sequence of most two- and three-semester physics courses nationwide. We have worked to make physics interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from fundamental to more advanced concepts, building upon what students have already learned and emphasizing connections between topics and between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses and future careers. The organization and pedagogical features were developed and vetted with feedback from science educators dedicated to the project.
