The Supplement emphasizes music published since 1995, or titles that were overlooked in the previous editions. Entries are arranged from Genesis through Revelation.

Catalogue of Choral Music Arranged in Biblical Order Gale Cengage

Larson visits these and many other questions in full view of his colleagues, administrators, and students. He writes open letters to faculty and students in which he explores doubts about his own work as a teacher, his successes and failures in the classroom, his questions about the educational system, and his ideas on how to handle some of the more perplexing dilemmas today's teachers face. His colleagues and students reply with ideas and questions of their own. This book will lead teachers (preservice and inservice), administrators, and education professors to reflect on their own systems, their own teaching methods, the ways they assess student work, and their hope and expectations for their students.

From the Editor's Desk A Question of Fairness There has been no teaching so far this year in Mr. Larson's classroom. There has been learning, but there has been no teaching. There is a teacher in the classroom, but he does not teach. Cara Landry is a budding journalist. When she posts a scathing editorial about her burned-out teacher on the bulletin board one afternoon, everything changes. Prodded into action for the first time in years, Mr. Larson challenges his fifth-grade students to create a real newspaper. Soon The Landry News gets more attention than either Cara or her teacher bargained for, as the principal uses the paper to try to get Mr. Larson fired. While the whole town is swept up in a dramatic debate over The Landry News and the First Amendment, Mr. Larson uses the controversy as raw material for some of the finest teaching of his career. And Cara and her classmates learn the importance of tempering a newspaper's truth with mercy. But will their lessons cost Mr.

Larson his job? Written by the author of the immensely popular *Frindle*, this is a compelling new novel about the collision of a student in need of a teacher with a teacher in need of inspiration.

Cut and Run Oxford University Press, USA
Emphasizing the value of idiomatic and unconstrained language, this introductory textbook begins with an overview of the fundamental principles of translation. The rest of the chapters expand and illustrate these principles with examples from a wide range of languages--particularly Asian, African, and Amerindian languages. The author uses the recently established principles of text-linguistics in her explanations of the interplay of syntax, semantics, and communicative force through stress and variations of word order in the composition of a text. She also presents a thorough treatment of collocations and the semantic distortions of literal translation. Annotation copyrighted by Book News, Inc., Portland, OR
