When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in

detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

Popular Mechanics

Japanese carmaker Honda has pioneered a new breed of multinational enterprise - true manufacturing at the global scale. Honda has been a leader in confounding predictions that Japan's carmakers would and could never transfer their success abroad, and that a wholesale 'Japanization' of the west would be provoked if they did. The book covers manufacture, research and development, sourcing of components, human resources and labour relations, collaboration with western firms, political controversy, and the role of concepts and ideas, in Japan, North America, and Europe.

The Internationalization of Japan provides the English-speaking reader with the opportunity to hear what some of Japan's leading social scientists and other commentators have to say about the internationalization of their country as well as their country's impact overseas. The topic is of extreme importance now as the international community demands a greater Japanese contribution to international society as well as changes in Japan to facilitate foreign access. The book discusses the internationalization of politics, economy and society. Topics of special interest include the internationalization of Japanese capital, the response of Japanese society to foreign workers, local level initiatives for internationalization and the internationalization of education. To place the internationalization of Japan in comparative perspective there are chapters on Britain and the United States from a leading British and a leading American political scientist respectively. These two and the editors aside, all the contributors are highly regarded Japanese scholars or commentators.
