Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is

becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools

developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these

services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases Whitaker's Books in Print CIFOR Hatchback, including special/limited editions. Does NOT cover features specific to Dune models, or facelifted Polo range introduced June 2005. Petrol: 1.2 litre (1198cc) 3-cyl & 1.4 litre (1390cc, non-FSI) 4-cyl. Every family has a story of
how they arrived in
America, whether it was a
few months, years, decades,
or centuries ago. *Journeys:
An American Story*
celebrates the vastness and
variety of immigration tales
in America, featuring
seventy-two essays about the
different ways we got here.
This is a collection of family
lore, some that has been
passed down through
generations, and some that is
being created right now.
Journeys captures the
quintessential idea of the
American dream. The
individuals in this book are
only a part of the brilliant
mosaic of people who came
to this country and made it
what it is today. Read about
the governor's
grandfathers who dug
ditches and cleaned sewers,
laying the groundwork for a

budding nation; how a future
cabinet secretary crossed the
ocean at age eleven on a
cargo ship; about a young
boy who fled violence in
Budapest to become one of
the most celebrated
American football players;
the girl who escaped
persecution to become the
first Vietnamese American
woman ever elected to the
US congress; or the limo
driver whose family took a
seventy-year detour before
finally arriving at their
original destination, along
with many other fascinating
tales of extraordinary and
everyday Americans. In
association with the New-
York Historical Society,
Andrew Tisch and Mary
Skafidas have reached out to
a variety of notable figures to
contribute an enlightening
and unique account of their
family's immigration story.
All profits will be donated to
the New-York Historical
Society and the Statue of

Management decisions on
appropriate practices and policies
regarding tropical forests often
need to be made in spite of
innumerable uncertainties and
complexities. Among the
uncertainties are the lack of
formalization of lessons learned
regarding the impacts of previous
programs and projects. Beyond
the challenges of generating the
proper information on these
impacts, there are other
difficulties that relate with how to
socialize the information and
knowledge gained so that change
is transformational and enduring.
The main complexities lie in
understanding the interactions of
social-ecological systems at
different scales and how they
varied through time in response
to policy and other processes.
This volume is part of a broad
research effort to develop an
independent evaluation of
certification impacts with
stakeholder input, which focuses
on FSC certification of natural
tropical forests. More specifically,
the evaluation program aims at
building the evidence base of the
empirical biophysical, social,
economic, and policy effects that
FSC certification of natural forest
has had in Brazil as well as in
other tropical countries. The
contents of this volume highlight

the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.
