Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by

DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases

Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with

stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Every family has a story of how they arrived in America, whether it was a few months, years, decades, or centuries ago. Journeys: An American Story celebrates the vastness and variety of immigration tales in America, featuring seventy-two essays about the different ways we got here. This is a collection of family lore, some that has been passed down through generations, and some that is being created right now. Journeys captures the quintessential idea of the American dream. The individuals in this book are only a part of the brilliant mosaic of people who came to this country and made it what it is today. Read about the governor ' s grandfathers who dug ditches and cleaned sewers, laying the groundwork for a budding nation; how a future cabinet secretary crossed the ocean at age eleven on a cargo ship; about a young boy who fled violence in Budapest to become one of the most celebrated American football players; the girl who escaped persecution to become the first Vietnamese American woman ever elected to the US congress; or the limo driver whose family took a seventy-year detour before finally arriving at their original destination, along with many other fascinating tales of extraordinary and everyday Americans. In association with the New-York Historical Society, Andrew Tisch and Mary Skafidas have reached out to a variety of notable figures to contribute an enlightening and unique account of their family ' s immigration story. All profits will be donated to the New-York Historical Society and the Statue of Liberty Ellis Island Foundation.
