Complete Book of Collectible Cars Veloce Publishing Ltd

This book details the origin and racing history of the Ferrari 333 SP. Uniquely, none of the 333 SP models were entered into races by Ferrari itself. The cars were built specifically for customer use; a purchase price of \$900,000 included two spare engines and race technical support supplied by Ferrari engineers. A total of 40 cars were built; the first four by Ferrari, the remainder manufactured by Dallara & Michellotto using Ferrari engines. All of the cars were sold to, and race entries made by, privateer teams. From 1994, the cars contested the IMSA World Sports Car Championship, the United States Road Racing Championship, and the American Le Mans Series, at circuits throughout North America. In 1997, the cars also featured in the Europe-based International Sports Racing Series, as well as the 24 Hours of Le Mans. Two years later, the

Doran-Lista team installed a Judd V10 engine into its 333 SP, with the aim of increasing power and improving fuel efficiency. In all, from the 126 races entered, 47 victories were claimed by the 333 SP.

N.A.D.A Official Used Car Guide Princeton University Press
A groundbreaking reinterpretation that draws on cognitive theory to show that belief wasn't absent from—but rather was at the heart of—Roman religion. Belief and Cult argues that belief isn't uniquely Christian but was central to ancient Roman religion. Drawing on cognitive theory, Jacob Mackey shows that despite having nothing to do with salvation or faith, belief underlay every aspect of Roman religious practices—emotions, individual and collective cult action, ritual norms, social reality, and social power. In doing so, he also offers a thorough argument for the importance of belief to other non-Christian religions. At the individual level, the book argues, belief played an indispensable role in the genesis of cult action and religious emotion. However, belief also had a collective dimension. The cognitive theory of Shared Intentionality shows how beliefs may be shared among individuals, accounting for the existence of written, unwritten, or even unspoken ritual norms. Shared beliefs permitted the choreography of collective cult action and gave cult acts their social meanings. The book also elucidates the role of shared belief in creating and maintaining Roman social reality. Shared belief allowed the Romans to endow agents, actions, and artifacts with socio-religious status and power. In a deep sense, no man could count as an augur and no act of animal slaughter as a successful offering to the gods, unless Romans collectively shared appropriate beliefs about these things. Closely examining augury, prayer, the religious enculturation of children, and the Romans' own theories of cognition and cult, Belief and Cult promises to revolutionize the understanding of Roman religion by demonstrating that none of its features makes sense without Roman belief.
