Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so

completely before in the many books on the

same subject. As a text book it is a revelation.

Taking nothing for granted, except the ability

to read and comprehend a simple description of mechanical processes, de Carle takes his reader

through every stage and every operation of watch repairing ...and to deal with them

thoroughly is quite a programme - it takes 300

pages containing 24 chapters, two appendices

and 553 illustrations. The fine

draughtsmanship and accurate technical detail

of the illustrations set a new standard. Practical

Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet

subject. The publication of the book marks the
