This multidisciplinary volume brings together wide-ranging empirical research that goes behind the scenes of diverse organizations dealing with business, politics, law, media, education, and sports to unravel stereotypes of discursive leadership practices as they unfold in situ. It includes contributions that explore how leadership discourse is impacted by increasing pressures of "glocalization" (the need to communicate across cultures and languages), "mediatization" (leaving ubiquitous digital traces),

standardization (with quality management programmes negotiating organizational procedures), mobility (endless fast-paced long distance synchronization) and acceleration (permanent co-adaption and change). The discussion of purposefully chosen case studies moves beyond questions of who is a leader and what leaders do, to how leadership stereotypes are being challenged in various communities of practice, and thereby making change possible. Cross-cultural and interdisciplinary approaches are used to get deeper insights into the competing, multi-voiced, controversial and complex identities and relationships enacted

---

in leadership discourse practices.

As the most widely documented language in human history, English holds a unique key to unlocking some of the mysteries of the uniquely human endowment of language. Yet the field of World Englishes has remained somewhat marginal in linguistic theory. This collection heralds a more direct and mutually constructive engagement with current linguistic theories, questions, and methodologies. It achieves this through areal overviews, theoretical chapters, and case studies. The 36 articles are divided between four themes: Foundations, World Englishes and Linguistic Theory, Areal Profiles, and Case Studies. Part I sets

out the complex history of the global spread of English. This is followed, in Part II, by chapters addressing the mutual relevance and importance of World Englishes and numerous theoretical subfields of Linguistics. Part III offers detailed accounts of the structure and social histories of specific varieties of English spoken across the globe, highlighting points of theoretical interest. The collection closes with a set of case studies that exemplify the type of analysis encouraged by the volume. As attention is focused on innovative work at the interface of dialect description and theoretical explanation, the book is more succinct in its treatment of applied themes, which are given complementary coverage in other works.

Inspire your students to develop their sociological imaginations in *Our Social World*. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate, and apply information about the social world; to see the connection between the world and personal events from a new perspective; and to confront sociological issues on a day-to-day basis. Organized around the "Social World Model", a conceptual framework used across chapters to see the complex links between various micro-to macro-levels of the social system, students will develop the practice of using three levels of analysis, and to view

sociology as an integrated whole, rather than a set of discrete subjects.

Realistic and informed: It explores a range of perspectives on educational research, from planning to data collection to international collaboration . Challenging: It integrates a holistic and critical view on the process of educational research . Culturally aware: It covers a variety of research projects from different countries and encourages you to challenge dominant perspectives in education This is the first major English language textbook for postgraduate and postdoctoral education researchers that represents and explores the range of

research traditions that exist throughout Europe and what they mean in practice. Genre-based Automated Writing Evaluation for L2 Research Writing Oxford University Press This book contributes to the recent theoretical developments in the area of mutual interactions of valency and aspect, as expressed in different types of verb-related nominal structures (nominalizations and synthetic compounds). A wide range of data from Slavic, Hellenic, Germanic, Romance and Semitic languages provides an empirical testing ground for competing theoretical explanations couched in the lexicalist and construction-based frameworks. This book looks at experience in government restructuring and devolution from a variety of national and international perspectives, both within the European Union and elsewhere, focusing on lessons learned and ways forward. Since the 1980s, there has been a global trend to give more power to local governments. Even in Korea and the United Kingdom, the most centralised countries in the OECD, local government powers have increased, with substantial economic benefits. Within the European Union, the

principle of subsidiarity has enshrined the idea of devolution. New member states, particularly in central and eastern Europe, have significantly created new and self-sufficient local and regional governments. However, this process has been complicated. Devolution is not a panacea in its own right, and need not lead to economic growth. While it can encourage savings through collaboration, it can also lead to confused lines of authority and can complicate policy formation and implantation. Devolution can strain local budgets, forcing local governments to rely on their own sources of

---

finance, rather than central government transfers. Suburbanisation, rural depopulation, the growth of some regions, and the decline of others have raised new problems, particularly related to inter-governmental cooperation among local governments and different levels of government. In many cases, an increased number of governments has increased administrative costs.

The Short Story after Apartheid offers the first major study of the anglophone short story in South Africa since apartheid's end. By focusing on the short story

this book complicates models of South African literature dominated by the novel and contributes to a much-needed generic and formalist turn in postcolonial studies.

Literary texts are sites of productive struggle between formal and extra-formal concerns, and these brief, fragmentary, elliptical, formally innovative stories offer perspectives that reframe or revise important concerns of post-apartheid literature: the aesthetics of engaged writing, the politics of the past, class and race, the legacies of violence, and the struggle over the land. Through an analysis of key texts from the period by Nadine Gordimer, Ivan Vladislavić, Zoë Wicomb, Phaswane Mpe, and Henrietta Rose-Innes, this book assesses the place of the short story in post-apartheid writing and develops a fuller model of how artworks allow and

---

disallow forms of social thought.

Recent research suggests that good relationships between parents and their children's providers or teachers could lead to positive outcomes for children and families.

Positive, mutually respectful, and collaborative relationships between families and schools and education providers and teachers contribute to young children's school readiness, increase positive family

engagement in children's programs, and strengthen home-program connection, a critical factor to children's school success. Bridging Family-Teacher Relationships for ELL and Immigrant Students is a comprehensive reference source that focuses on research-based pedagogical practices for teaching young English language learners (ELL) and immigrants. It specifically looks at strategies across the curriculum including social-emotional development, parent involvement, language development, and more. While highlighting major themes that include academic engagement and achievement among ELL and immigrant children, factors affecting partnerships with schools

---

and home, the impact of home environments on school readiness, and student performance, this book shares pedagogical practices across different subjects that use partnerships with families of ELL/immigrants. It is intended for classroom teachers (early childhood and K-12), parents, faculty, school administrators, academicians, professionals, researchers, and students interested in family-teacher relationships.

This volume is the first to provide an up-to-date and comprehensive history of phonology from the earliest known

examples of phonological thinking, through the rise of phonology as a field in the twentieth century, and up to the most recent advances. The volume is divided into five parts. Part I offers an account of writing systems along with chapters exploring the great ancient and medieval intellectual traditions of phonological thought that form the foundation of later thinking and continue to enrich phonological theory. Chapters in Part II describe the important schools and individuals of the late nineteenth and early twentieth centuries who shaped phonology as an organized

---

scientific field. Part III examines mid-twentieth century developments in phonology in the Soviet Union, Northern and Western Europe, and North America; it continues with precursors to generative grammar, and culminates in a chapter on Chomsky and Halle's *The Sound Pattern of English* (SPE). Part IV then shows how phonological theorists responded to SPE with respect to derivations, representations, and phonology-morphology interaction. Theories discussed include Dependency Phonology, Government Phonology, Constraint-and-Repair theories, and Optimality Theory. The part ends with a chapter on the study of variation. Finally, chapters in Part V look at new methods and approaches, covering phonetic explanation, corpora and phonological analysis, probabilistic phonology, computational modelling, models of phonological learning, and the evolution of phonology. This in-depth exploration of the history of phonology provides new perspectives on where phonology has been and sheds light on where it could go next.

How do children determine which identity becomes paramount as they grow into

---

adolescence and early adulthood? Which identity results in patterns of behaviour as they develop? To whom or to which group do they feel a sense of belonging? How might children, adolescents and young adults negotiate the gap between their own sense of identity and the values promoted by external influences? The contributors explore the impact of globalization and pluralism on the way most children and adolescents grow into early adulthood. They look at the influences of media and technology that can be felt within the living spaces of their homes, competing with the religious and cultural influences of family and community, and consider the ways many children and adolescents have

developed multiple and virtual identities which help them to respond to different circumstances and contexts. They discuss the ways that many children find themselves in a perpetual state of shifting identities without ever being firmly grounded in one, potentially leading to tension and confusion particularly when there is conflict between one identity and another. This can result in increased anxiety and diminished self-esteem. This book explores how parents, educators and social and health workers might have a raised awareness of the issues generated by plural identities and the overpowering human need to belong so that they can address associated issues and nurture a sense of

---

wholeness in children and adolescents as they grow into early adulthood.

English local documents – leases,

wills, accounts, letters and the like – provide a unique resource for historical sociolinguistics.

Abundant from the early fifteenth century, they represent the language and concerns of people from a wide range of social, institutional and geographical backgrounds. However, as relatively few documents have been available digitally or in print, they have been an underresearched resource. This volume shows the tremendous potential of late- and post-medieval English local documents: highly variable in language, often colourful, including developing formulae as well as

---

glimpses of actual recorded speech. The volume contains eleven chapters relating to a new resource, A Corpus of Middle English Local Documents (MELD). The first four chapters outline a theoretical and methodological approach to the study of local documents. The remaining seven present studies of different aspects of the material, including supralocalization, local patterns of spelling and morphology, land terminology, punctuation, formulaicness and multilingualism. This comprehensive book will serve as a step-by-step guide to Laban/Bartenieff Movement Analysis, updating and expanding concepts and practices. Following extensive research on the method developed by Rudolf von Laban and his disciples, this book explains movement principles, exercises, and motif symbols in detail. Organized according to the four categories of Laban/Bartenieff Movement Analysis (Body-Effort-Shape-Space), additional chapters present the different developments of the theory in relation to performing arts and movement

---

therapy. The author draws on Laban/Bartenieff Movement Analysis as a dynamic and connective approach, traveling from classroom and studio to everyday life, stage performance, and film acting. The Laban perspective serves as a multimedia artistic viewpoint, intertwining theory, learning, and imagery. This unique approach to this internationally used method is essential reading for educators and students of dance and other performing arts and movement-related professions. The Bloomsbury Handbook of Culture and Identity from Early Childhood to Early Adulthood Routledge Pose, Wobble, Flow presents an exciting, liberatory framework for disrupting the pervasive myth that there is one set of surefire, culturally neutral best practices. In this new edition, the authors update and expand their pedagogical model to support lifelong success for teachers of all subject areas and grade levels. Providing six different teaching stances or “poses” that teachers can use to meet the needs of all students, this popular resource offers guidance for teaching and learning in today’s challenging sociopolitical climate. The authors describe how teachers can expect to “wobble” as they adapt instruction to the needs of their students, while also incorporating new insights about their own positionality and preconceptions of teaching. Readers are encouraged to recognize this flexibility as a positive process or “flow”

---

that can be used to address challenges and adopt ambitious teaching strategies like those depicted in this book. Each chapter highlights a particular pose, describes how to work through common wobbles, incorporates teacher voices, and provides discussion activities for collective teacher inquiry.

**PRAISE FOR THE FIRST EDITION—** “ In *Pose, Wobble, Flow*, Garcia and O’ Donnell-Allen remind all of us that teaching is not about following directions: it ’ s about listening to our students and paying attention to the social forces that shape their lives; about learning how to navigate department, school, district, and federal rules to benefit our students so we can keep a job while we continue to honor our core beliefs about education. ” —Linda Christensen, director, Oregon Writing Project,

Lewis & Clark College

“ Antero Garcia and Cindy O’ Donnell-Allen have written a book about teaching that I ’ ve been hoping someone would write. They deftly provide a clear and insightful framework from which any thoughtful teacher can build a vital practice, while also inserting a wealth of examples to ground the framework in working classrooms. It ’ s a must-have for preservice and inservice teachers who care about their teaching. ”

This book empirically examines health care financing reforms and popular responses in three major cities in East Asia: Shanghai, Singapore, and Hong Kong. It adopts a new revised version of the theory of historical

---

institutionalism to compare and explain the divergent reform paths in these three places over the past three decades. It also examines forces that propel institutional change. The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them. It shows that health care systems in Shanghai, Singapore, and Hong Kong were the products of Western presence in the nineteenth century. It illustrates how greater attention is paid to the roles played by ideas, actors, and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms. It shows that health care financing reform is shaped by a complex interplay of forces over time. It also provides the most updated material about health care financing reforms in Shanghai, Singapore, and Hong Kong. The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests. It shows that institutional changes in health care financing system can be incremental but transformative in nature. It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs. This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change.

This book debates the meaning and purpose

of corporate governance in advanced countries today. The issues discussed centre on relationships within the firm e.g. between labour, managers, and investors, and relationships outside the firm that affect consumers or the environment.
