Inspire your students to develop their sociological imaginations in Our Social World. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate, and apply information about the social world; to see the connection between the world and personal events

from a new perspective; and to confront sociological issues on a day-to-day basis. Organized around the "Social World Model", a conceptual framework used across chapters to see the complex links between various micro- to macro-levels of the social system, students will develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of discrete subjects.

Corporate governance is a complex idea that is often inappropriately simplified as a cookbook of recommended measures to improve financial performance. Meta studies of published research show that the supposed benign effects of these

measures - independent directors or highly incentivised executives - are at best context-specific. There is thus a challenge to explain the meaning, purpose, and importance of corporate governance. This volume addresses these issues. The issues discussed centre on relationships within the firm e.g. between labour, managers, and investors, and relationships outside the firm that affect consumers or the environment. The essays in this collection are the considered selection by the editors and the contributors themselves of what are seen as some of the most weighty and urgent issues that connect the corporation and

society at large in developed economies with established property rights. The essays are to be read in dialogue with each other, giving a richer understanding than could be obtained by shepherding all contributions into a single mould. Nevertheless taken together they demonstrate a shared sense of deep concern that the corporate governance agenda has been and still is on the wrong track. The contributors, individually and collectively, identify in this compendium both a research programme and a platform for change.

This volume is the first to provide an up-to-date and comprehensive history of phonology from the earliest known examples of phonological thinking, through the rise of phonology as a field in the twentieth century, and up to the most recent advances. The volume is divided into five parts. Part I offers an account of writing systems along with chapters exploring the great ancient and medieval intellectual traditions of phonological thought that form the foundation of later thinking and continue to enrich

phonological theory. Chapters in Part II describe the important schools and individuals of the late nineteenth and early twentieth centuries who shaped phonology as an organized scientific field. Part III examines mid-twentieth century developments in phonology in the Soviet Union, Northern and Western Europe, and North America; it continues with precursors to generative grammar, and culminates in a chapter on Chomsky and Halle's *The Sound Pattern of English (SPE)*. Part IV then shows how phonological theorists responded to SPE with respect to derivations, representations, and phonology-morphology interaction. Theories discussed include Dependency Phonology, Government Phonology, Constraint-and-Repair theories, and Optimality Theory. The part ends with a chapter on the study of variation. Finally, chapters in Part V look at new methods and approaches, covering phonetic explanation, corpora and phonological analysis, probabilistic phonology, computational modelling, models of phonological learning, and the evolution of phonology. This in-depth exploration of the history of phonology provides new perspectives on where phonology has

been and sheds light on where it could go next.

This book empirically examines health care financing reforms and popular responses in three major cities in East Asia: Shanghai, Singapore, and Hong Kong. It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades. It also examines forces that propel institutional change. The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them. It shows that health care systems in Shanghai, Singapore, and Hong Kong were the products of Western presence in the nineteenth century. It illustrates how greater attention is paid to the roles played by ideas, actors, and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms. It shows that health care financing reform is shaped by a complex interplay of forces over time. It also provides

the most updated material about health care financing reforms in Shanghai, Singapore, and Hong Kong. The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests. It shows that institutional changes in health care financing system can be incremental but transformative in nature. It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs. This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change.

Language Teaching, Pedagogy and Curriculum Design explores the possibilities of how language teaching research can be used to inform pedagogy. It informs on the realisation among language teachers of the need to be informed on the contributions of research to language learning and to enable them to better reflect on instructional design and practices, and their underlying theories. This book is intended for ESL researchers, teachers and students, especially those who are interested in expanding and developing their

knowledge in language teaching not just based on their own experiences in language classrooms but also on current contributions of research on issues in language teaching, pedagogy and curriculum in the region.

Demotivation in Second Language Acquisition Codeofchina Inc.
Pose, Wobble, Flow presents an exciting, liberatory framework for disrupting the pervasive myth that there is one set of surefire, culturally neutral best practices. In this new edition, the authors update and expand their pedagogical model to support lifelong success for teachers of all subject areas and grade levels. Providing six different teaching stances or “poses” that teachers can use to meet the needs of all students, this popular resource offers guidance for teaching and learning in today’s challenging sociopolitical climate. The authors describe how teachers can expect to “wobble” as they adapt instruction to the needs of their students, while also incorporating new insights about their own positionality and preconceptions of teaching. Readers are encouraged to recognize this flexibility as a positive process or “flow” that can be used to address challenges and adopt ambitious teaching strategies like those depicted in this book. Each chapter highlights a particular pose, describes how to work

through common wobbles, incorporates teacher voices, and provides discussion activities for collective teacher inquiry. PRAISE FOR THE FIRST EDITION— “ In Pose, Wobble, Flow, Garcia and O’Donnell-Allen remind all of us that teaching is not about following directions: it’s about listening to our students and paying attention to the social forces that shape their lives; about learning how to navigate department, school, district, and federal rules to benefit our students so we can keep a job while we continue to honor our core beliefs about education. ” —Linda Christensen, director, Oregon Writing Project, Lewis & Clark College “ Antero Garcia and Cindy O’Donnell-Allen have written a book about teaching that I’ve been hoping someone would write. They deftly provide a clear and insightful framework from which any thoughtful teacher can build a vital practice, while also inserting a wealth of examples to ground the framework in working classrooms. It’s a must-have for preservice and inservice teachers who care about their teaching. ” —Bob Fecho, professor and department head, University of Georgia

The Short Story after Apartheid offers the first major study of the anglophone short story in South Africa since apartheid’s end. By focusing on the short story this book complicates models of South African literature dominated by the novel and contributes to a much-needed generic and formalist turn in postcolonial studies. Literary texts

are sites of productive struggle between formal and extra-formal concerns, and these brief, fragmentary, elliptical, formally innovative stories offer perspectives that reframe or revise important concerns of post-apartheid literature: the aesthetics of engaged writing, the politics of the past, class and race, the legacies of violence, and the struggle over the land. Through an analysis of key texts from the period by Nadine Gordimer, Ivan Vladislavić, Zoë Wicomb, Phaswane Mpe, and Henrietta Rose-Innes, this book assesses the place of the short story in post-apartheid writing and develops a fuller model of how artworks allow and disallow forms of social thought.

English as a Global Language Oxford University Press

This volume showcases recent sociolinguistic research about Wales and offers contributions from scholars working on Welsh, English and other languages spoken in the country. The chapters present a range of frameworks and

methodologies used in sociolinguistics and apply them to the Welsh linguistic context. This context is very distinctive compared to the rest of the UK and represents a prime ground to observe different aspects of the interplay between language and society. The structure of the volume reflects the linguistic diversity of the country and is divided into three sections. The first section examines recent research on Welsh, the second section focuses on English, and the third section deals with research on Welsh and English together, as well as research on other languages spoken in Wales. The book will be useful to those wanting to discover more about language and society in Wales, as well as to those already working in the field as it offers new perspectives and insights.

Recent research suggests that good relationships between parents and their children's providers or teachers could lead to positive outcomes for children and families. Positive, mutually respectful, and collaborative relationships between families and schools and education providers and teachers contribute to young children's school readiness, increase positive family engagement in children's programs, and strengthen home-program connection, a critical factor to children's school success. Bridging Family-Teacher Relationships for ELL and Immigrant Students is a comprehensive reference source that focuses on research-based

pedagogical practices for teaching young English language learners (ELL) and immigrants. It specifically looks at strategies across the curriculum including social-emotional development, parent involvement, language development, and more. While highlighting major themes that include academic engagement and achievement among ELL and immigrant children, factors affecting partnerships with schools and home, the impact of home environments on school readiness, and student performance, this book shares pedagogical practices across different subjects that use partnerships with families of ELL/immigrants. It is intended for classroom teachers (early childhood and K-12), parents, faculty, school administrators, academicians, professionals, researchers, and students interested in family-teacher relationships. English local documents – leases, wills, accounts, letters and the like – provide a unique resource for historical sociolinguistics. Abundant from the early fifteenth century, they represent the language and concerns of people from a wide range of social, institutional and geographical backgrounds. However, as relatively few documents have been available digitally or in print, they have been an underresearched resource. This volume shows the tremendous potential of late- and post-medieval English local documents: highly

variable in language, often colourful, including developing formulae as well as glimpses of actual recorded speech. The volume contains eleven chapters relating to a new resource, A Corpus of Middle English Local Documents (MELD). The first four chapters outline a theoretical and methodological approach to the study of local documents. The remaining seven present studies of different aspects of the material, including supralocalization, local patterns of spelling and morphology, land terminology, punctuation, formulaicness and multilingualism.

This book examines reports that are written by reviewers of submissions to a peer-reviewed journal. This includes a thorough study of the reports from the perspectives of context, content and genre, as well as from the point of view of pragmatics and politeness. The author examines the use of evaluative language, and the roles reviewers assume as they make their evaluations. He also explores how reviewers learn to write these reports. He then discusses the results of these analyses from the point of view of reviewer training, making suggestions for further research in the area of editorial peer

review. The demystification of this occluded genre will be of benefit to doctoral students and early career academics not yet familiar with the peer review process, as well as those working in the broader areas of English for Specific Purposes and English for Academic Purposes, discourse analysis and writing for publication.

The Oxford Handbook of World Englishes
Routledge

This book provides a collection of articles that reflect the current state of affairs in the blossoming field of World Englishes by bringing together several innovative synchronic and diachronic approaches. It contributes to the ongoing theoretical discussion concerning the criteria that make a low-frequency item represent an incipient change and examines the suitability of the sociolinguistics of globalisation theory for the study of non-traditional avenues for the spread of vernacular varieties of English (recent migrations, the entertainment industry, the web). It explores crucial aspects of language change and dialect evolution through the study of grammatical phenomena and the particular linguistic and socio-historical factors conditioning

them. Together with theoretical questions, the volume shows a concern for methodological issues, such as sociolinguistic interviews, map-task experiments, metalinguistic comments, acceptability judgments and corpus-based methods. This volume represents the latest trends in the field and will undoubtedly set the agenda for the years ahead.

This book looks at experience in government restructuring and devolution from a variety of national and international perspectives, both within the European Union and elsewhere, focusing on lessons learned and ways forward. Since the 1980s, there has been a global trend to give more power to local governments. Even in Korea and the United Kingdom, the most centralised countries in the OECD, local government powers have increased, with substantial economic benefits. Within the European Union, the principle of subsidiarity has enshrined the idea of devolution. New member states, particularly in central and eastern Europe,

have significantly created new and self-sufficient local and regional governments. However, this process has been complicated. Devolution is not a panacea in its own right, and need not lead to economic growth. While it can encourage savings through collaboration, it can also lead to confused lines of authority and can complicate policy formation and implantation. Devolution can strain local budgets, forcing local governments to rely on their own sources of finance, rather than central government transfers. Suburbanisation, rural depopulation, the growth of some regions, and the decline of others have raised new problems, particularly related to inter-governmental cooperation among local governments and different levels of government. In many cases, an increased number of governments has increased administrative costs.

This multidisciplinary volume brings together wide-ranging empirical research that goes behind the scenes of diverse organizations dealing with business,

politics, law, media, education, and sports to unravel stereotypes of discursive leadership practices as they unfold in situ. It includes contributions that explore how leadership discourse is impacted by increasing pressures of "glocalization" (the need to communicate across cultures and languages), "mediatization" (leaving ubiquitous digital traces), standardization (with quality management programmes negotiating organizational procedures), mobility (endless fast-paced long distance synchronization) and acceleration (permanent co-adaptation and change). The discussion of purposefully chosen case studies moves beyond questions of who is a leader and what leaders do, to how leadership stereotypes are being challenged in various communities of practice, and thereby making change possible. Cross-cultural and interdisciplinary approaches are used to get deeper insights into the competing, multi-voiced, controversial and complex identities and relationships enacted in leadership discourse practices.

SLA literature tends to focus

predominantly on what motivates language learners, but what demotivates them has not been widely discussed. This book, focusing exclusively on demotivation, will help readers to understand motivational issues from a different perspective. The aims of the work are threefold: to present the current developments of demotivation research in the field of SLA and bridge motivational theory/research and demotivation research; to promote the understanding of possible causes of demotivation; and to expand the focus of demotivation research through a reflection on current motivation theory/research and a discussion of methodological issues. The research presented in this book is situated in Japanese English-teaching contexts and will serve as a foundation for anyone wishing to better understand the causes of demotivation in SLA and to explore the topic in their own contexts.
