Electric Vehicle Integration into Modern Power Networks provides coverage of the challenges and opportunities posed by the progressive integration of electric drive vehicles. Starting with a thorough overview of the current electric vehicle and battery state-of-the-art, this work describes dynamic software tools to assess the impacts resulting from the electric vehicles deployment on

the steady state and dynamic operation of electricity grids, identifies strategies to mitigate them and the possibility to support simultaneously large-scale integration of renewable energy sources. New business models and control management architectures, as well as the communication infrastructure required to integrate electric vehicles as active demand are presented. Finally, regulatory issues of integrating electric vehicles into modern power systems are addressed. Inspired by two courses held under the EES-UETP umbrella in 2010 and 2011, this contributed volume consists of nine chapters written by leading researchers and professionals from the industry as well as academia.

Several key

features make this book special:;* Global Marketing offers a marketing management thrust into the global market. It does not simply replicate domestic marketing issues with the addition of an international dimension. Rather, it dives headfirst into global issues.;* It covers the entire range of international marketing, including start-up operations and new market entry considerations. However, its main emphasis rests on the key concerns of the multinational and global corporation.;* It places key emphasis on the cultural and

geographic dimensions in conjunction with their effects on marketing management. ; * It examines global marketing from a truly global perspective, rather than just from the U.S. point of view. As a result, the concerns of firms around the world are addressed, confronted, and analyzed. ; * Global Marketing integrates the important societal dimensions of diversity, environmental concern, ethics, and economic transformation.
