"A balance of sophistication and clarity in the writing, authoritative entries, and strong cross-referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture. The contents feature major architects, firms, and professional issues; buildings, styles, and sites; the architecture of cities and countries; critics and historians; construction, materials, and planning topics; schools, movements, and stylistic and theoretical terms. Entries include well-selected bibliographies and illustrations."--"Reference that rocks," American Libraries, May 2005.

The first history of the
deaccession of objects from
museum collections that
defends deaccession as an
essential component of museum
practice. Museums often stir
controversy when they
deaccession works—formally
remove objects from permanent
collections—with some critics
accusing them of betraying
civic virtue and the public
trust. In fact, Martin Gammon
argues in *Deaccessioning and
Its Discontents*, deaccession
has been an essential
component of the museum
experiment for centuries.
Gammon offers the first
critical history of
deaccessioning by museums
from the seventeenth to the
twenty-first century, and
exposes the hyperbolic
extremes of “deaccession
denial”—the assumption that
deaccession is always
wrong—and “deaccession
apology”—when museums justify
deaccession by finding some

fault in the object—as symptoms of the same misunderstanding of the role of deaccessions in proper museum practice. He chronicles a series of deaccession events in Britain and the United States that range from the disastrous to the beneficial, and proposes a typology of principles to guide future deaccessions. Gammon describes the liquidation of the British Royal Collections after Charles I's execution—when masterworks were used as barter to pay the king's unpaid bills—as establishing a precedent for future deaccessions. He recounts, among other episodes, U.S. Civil War veterans who tried to reclaim their severed limbs from museum displays; the 1972 “Hoving affair,” when the Metropolitan Museum of Art sold a number of works to pay for a Velázquez portrait; and Brandeis University's decision (later reversed) to close its Rose Art Museum and sell its entire collection of contemporary art. An appendix provides the first extensive listing of notable deaccessions since the seventeenth century. Gammon ultimately argues that vibrant museums must evolve, embracing change, loss, and reinvention.
