Bertram 31 Ocean Cruise Guides

A history of English from the age of Beowulf to the rap of Eminem, “written with real authority, enthusiasm and love for our unruly and exquisite language” (The Washington Post). Many have written about the evolution of grammar, pronunciation, and vocabulary, but only Seth Lerer situates these developments within the larger history of English, America, and literature. This edition of his “remarkable linguistic investigation” (Booklist) features a new chapter on the influence of biblical translation and an epilogue on the relationship of English speech to writing. A unique blend of historical and personal narrative, both “erudite and accessible” (The Globe and Mail), *Inventing English* is the surprising tale of a language that is as dynamic as the people to whom it belongs. “Lerer is not just a scholar; he’s also a fan of English—his passion is evident on every page of this

examination of how our language came to sound—and look—as it does and how words came to have their current meanings...the book percolates with creative energy and will please anyone intrigued by how our richly variegated language came to be.” —Publishers Weekly (starred review)

The Capable Cruiser Friesen Press

This is a cruising guide with a difference. Many boaters may not be aware of the opportunities for walks accessible from anchorages along the B.C. coast. For those who cruise with dogs aboard, and for those who like to venture ashore to stretch their legs, the book is illustrated with charming maps describing walks up and down the coast. Framed by the author's many years of cruising on a beautiful wooden sailboat along with her husband and two dogs, it tells tales of mishaps, adventures, explorations and glorious days on the water. The book is set against the stunning backdrop of the waters, mountains and islands between the B.C. mainland and Vancouver Island. If you are an experienced sailor with extensive knowledge of the B.C. Coast, are new to boating, or even a confirmed landlubber and armchair sailor, you will love this book. It is a "must have" in every boat's cruising library.

As Sea Ray approaches its 50th anniversary, the commitment to quality and innovation that founder C. N. Ray instilled in the company decades ago remains stronger than ever. Sea Ray's unique philosophy, which centers on design excellence and dealer relationships, has helped the company thrive since the opening of its first plant in Oxford, Michigan, in 1959. Over the years, Sea Ray has faced many challenges, from inflation to oil embargoes to the "Great Boating

Depression. ” Through a combination of strong dealer relationships—which help ensure customer satisfaction and build brand loyalty—and a dedication to quality and innovation, Sea Ray strengthened its business and increased profitability in spite of those tough times. Today, Sea Ray produces more than 40 different boat models with worldwide sales totaling nearly \$1 billion a year. Boasting the widest variety of pleasure boats and one of the highest customer satisfaction ratings in the world, Sea Ray is now the largest manufacturer of superior-quality fiberglass boats, with seven U.S.-based manufacturing facilities and many dealers across the globe. Sea Ray's desire to create high-quality boats and its dedication to exceptional service keep the company at the top of the marine industry. *Commanding the Waterways: The Story of Sea Ray* provides a compelling account of the immediate affect Sea Ray had on the boating industry as well as its continued growth and success since entering the business 50 years ago.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, *Nada*, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines

new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

There is a growing crisis in our oceans: mysterious outbreaks of infectious disease are on the rise. Marine epidemics can cause mass die-offs of wildlife from the bottom to the top of food chains, impacting the health of ocean ecosystems as well as lives on land. Portending global environmental disaster, ocean outbreaks are fueled by warming seas, sewage dumping, unregulated aquaculture, and drifting plastic. Ocean Outbreak follows renowned scientist Drew Harvell and her colleagues into the field as they investigate how four iconic marine animals--corals, abalone, salmon, and starfish--have been devastated by disease. Based on over twenty years of research, this firsthand account of the sometimes gradual, sometimes exploding impact of disease on our ocean's biodiversity ends

with solutions and a call to action. Only through policy changes and the implementation of innovative solutions from nature can we reduce major outbreaks, save some ocean ecosystems, and protect our fragile environment.

Larry Pardey is accepted as one of the master craftsmen of the wooden-boat building world. He and his wife, Lin, have built and repaired many boats including two

strong, handsome cruising cutters and sailed twice around the world in them. This impressive book shows the process of constructing a boat hull with extensive photographs and drawings and includes ample time-saving procedures. From financial and time planning, lofting, floors and framing, selection of materials, planking and spiling, design considerations, to deck beams, man-hour norms and details critical to wooden boat construction, this volume serves as the most comprehensive guide a potential builder could ever use. Readers will also appreciate the discussions of how to select from numerous construction methods and materials, how to set up the shop and tips for sharpening and making your own tools. The new appendix on proper adhesive selection is "must" reading.
