Popular Science Consumer Guide Books For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack*

Mechanic, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over

the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them). *VW Golf, GTI, Jetta and Cabrio, 1999 Thru 2002* Gale / Cengage

Great Grilles of the '50s Haynes Publications

This book is designed to present, in one convenient source, comments published in periodicals about 325 automobile models manufactured since 1987 on a

model-by-model basis. These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models.

Nissan Z California Bill's Automotive Handbooks The 1950s was a "golden era" for Detroit, reflecting the endless optimism and futuristic view in America following World War II. Car designers and stylists were inspired by current day

fighter jets, space age technology, and chrome. Their creations sported great chrome grilles, bullet-nosed bumpers, enormous tail fins, cockpit-styled dashboards, and frames as big as aircraft carriers. The allure and emotional appeal of these cars has been well document in countless books over the years. But without exception all of these titles look fabulous '50s vehicles as the sum of their parts. None focus specifically on what many consider to be the most distinguishing aspect of many of the cars from the

their front grilles.

automotive
history. By the
time the first
generation Z-cars
