This book started as a self-serving exercise to personally organize the major details and interesting facts of each Indianapolis 500 over the hundred-plus-year history of the greatest race in the world. For many of us passionate racing fans who have attended a multitude of 500s, there is a tendency for the details of the races to (somewhat) blend together. I hope this book will help to provide clarity in this regard as well as educate. During high school, many of us chose to use CliffsNotes to assist in the education process. This book is somewhat patterned after that concept. It falls somewhere between Donald Davidson and Rick Schaffer—the best and by far the most detailed book on the history of the Indianapolis 500—and a multitude of pictorial books with limited information. I hope it will prove to be an easy read with entertaining and educational information.

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

There is something special about Alfa Romeo cars which can't be defined precisely but is, perhaps, best described as a vitality that creates a symbiosis between driver and machine: a oneness that no other marque seems to replicate. Alfa's Berlinas have always tended to be overshadowed by their spotlight-grabbing Coupé and Spider siblings, but enthusiasts with family car needs have always known that any saloon/sedan with the famous Alfa Romeo badge would deliver pure driving pleasure in equal measure. Here is the full story of Alfa's quirky but characterful Berlinas, from their beginnings in the early 1900s through to the start of a new millennium. Not only does the book describe and picture every model, it also contains useful information on restoring classic Alfa Romeos and details of marque specialists.

After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control. This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.

From the tremendously rich variety of Print's Regional Design Annual winners, Print's editors have selected 200 superb applications of illustration and photography in a wide range of print communications for the latest in the Print's Best series. Because of the Regional Annual's dense format, these winning entries had to be shown small. This book provides the opportunity not only to show the pieces at a generous size, thereby enhancing their impact, but also to feature many of them along with related materials. Here we have brilliantly effective ads, editorial spreads, posters, book and magazine covers, direct-mail, packaging, and corporate publications, all of which use illustration or photography, or a combination of the two, as a central element in the design. Publishing companies account for about a third of the work shown here - including newspaper pages, magazine covers and spreads, and book covers. Print ads represent many different kinds of businesses - among them beverage, food, delivery service, window manufacturers, and sports equipment companies. Posters promote arts festivals, art schools, seminars, and movies, and some do double duty as self-promotion pieces for their creators. Self-promotion for photographers and illustrators runs the gamut from posters and direct-mail pieces to printed ads. Corporate publications for well-known companies like IBM, Kodak, Adobe, and Strathmore include capability brochures, product promotions, and, of course, annual reports. The work shown covers the gamut of current illustrative and photographic techniques, making the book an invaluable resource for anyone in the design field.

[The Yugo](#) Veloce Publishing Ltd

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

[Road & Track](#) American Automobile Association

This is the only book that completely lists accurate technical data for all cars imported into the U.S. market from 1946-2000. With many imports approaching the antique status, this book will be a big seller across all generations of car enthusiasts. From the grandiose European carriages of the late Forties to the hot, little Asian imports of the Nineties, every car to grace American roadways from across the Atlantic and Pacific is carefully referenced in this book. & break;& break; Foreign car devotees will appreciate the attention given to capturing precise data on Appearance and Equipment, Vehicle I.D. Numbers, Specification Charts, Engine Data, Chassis, Technical Data, Options and Historical Information. & break;& break; Collectors, restorers and car buffs will love this key book from noted automotive authors, James Flammang and Mike Covello.

The Rover 800 grew out of a pioneering collaboration between Rover in Britain and Honda in Japan during the 1980s. This book tells the story of how the two companies worked together to produce the Rover 800 and its cousin, the Honda Legend. For those who remember the big front-wheel-driver Rover with affection, this book sets out the full history looking at the design and development of all models: saloons, fastbacks and coupes; the Sterling in North America; contemporary aftermarket modifications; Police usage and export variants. There is a helpful chapter on buying an owning a Rover 800 and the book is illustrated with 250 colour and black & white photographs.

The Alfa Romeo V6 Engine High-Performance Manual Writers Digest Books

In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

The Motor Industries of South America and Mexico

All of Alfa's great sportscars, including the convertibles and coupes, come vividly to life, from the pre-war 6C to today's Spider and GTV, including the Giulietta 750 and Giulia 101. Andrea Sparrow's informative text tells the Alfa Romeo story and details the individual models. David Sparrow's award-winning color photographs deliver a stylish appreciation for Alfa's world-renowned sports cars. A colorful celebration!
