Gale's Auto Sourcebook Chilton Book Company

This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagon. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

Autocar Gale Cengage

A youth and technology expert offers original research on teens' use of social media, the myths frightening adults, and how young people form communities. What is new about how teenagers communicate through services like Facebook, Twitter, and Instagram? Do social media affect the quality of teens' lives? In this book, youth culture and technology expert Danah Boyd uncovers some of the major myths regarding teens' use of social media. She explores tropes about identity, privacy, safety, danger, and bullying. Ultimately, Boyd argues that society fails young people when paternalism and protectionism hinder teenagers' ability to become informed, thoughtful, and engaged citizens through their online interactions. Yet despite an environment of rampant fear-mongering, Boyd finds that teens often find ways to engage and to develop a sense of identity. Boyd's conclusions are essential reading not only for parents, teachers, and others who work with teens, but also for anyone interested in the impact of emerging technologies on society, culture, and commerce. Offering insights gleaned from more than a decade of original fieldwork interviewing teenagers across the United States, Boyd concludes reassuringly that the kids are all right. At the same time, she acknowledges that coming to terms with life in a networked era is not easy or obvious. In a technologically mediated world, life is bound to be complicated. "Boyd's new book is layered and smart . . . It's Complicated will update your mind." —Alissa Quart, *New York Times Book Review* "A fascinating, well-researched and (mostly) reassuring look at how today's tech-savvy teenagers are using social media." —People "The briefest possible summary? The kids are all right, but society isn't." —Andrew Leonard, *Salon*

Standard Catalog of Imported Cars, 1946-1990

Intellichoice Incorporated

Training in the motor vehicle repair and sales sector in Germany was examined in a study that included the following approaches: review of the sector's structure/characteristics, institutional and social context, employment practices/trends, changes in the type of work and employment/training requirements, and available initial and continuing vocational education and training; in-depth case studies of five auto repair shops and dealerships; and identification of economic, employment, and training trends. It was discovered that, although the motor industry remains the most important industry in Germany's economy, it will not likely experience any more growth. Vehicle sales are declining; however, the volume of repairs is likely to increase as cars become older. Higher qualifications are being demanded of repair shop employees because of new environmental/safety standards and technological advances. Only about 7% of the sector's employees have no relevant vocational qualification, and one in every five employees is engaged in vocational training. Nearly all employees in aftersales departments and repair shops participate regularly in in-house continuing training and/or courses provided by manufacturers, importers, suppliers, or chambers of trades; however, many people in positions of responsibility within the sector still do not consider the available training activities sufficient. (Contains 63 tables/figures and 33 references.) (MN)

Popular Science

This book is designed to present, in one convenient source, comments published in periodicals about 325 automobile models manufactured since 1987 on a model-by-model basis. These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models.
