EBOOK: International Marketing, 5e Krause Publications

It is of central importance for companies to be innovative. To maximize their innovation potential, companies often rely on formal systems and processes for innovation management. It has been shown that such attempts have the side effect of inhibiting a number of valuable innovations. Some employees proceed informally and smuggle their innovations past formal barriers. Stephan Eicher analyses the interaction between bootleggers and their management. Using both qualitative and quantitative methods, he answers three primary research questions. What is the current state of research on bootlegging in R&D? How do bootleggers overcome illegitimacy upon disclosing their covert projects to decision-makers? How do different management styles and approaches affect the incidence of bootlegging? The results of this research paint a vivid picture of the relationship between covert innovation projects and the official management world of companies.

With well over 25 years of experience, Sven Beiker is widely regarded as the mobility expert in Silicon Valley specializing in

future trends for the automotive and mobility industries including autonomous driving, connectivity, electrification, and shared mobility. In *The Mobility Diaries: Connecting the Milestones of Innovation Leading to ACES*, he opens up his personal diary regarding his take on 50 years of mobility innovation and history interwoven with his experiences from 1978 to 2018. From the Foreword by Reilly P. Brennan: "Understanding how transportation itself evolved requires a unique prism. The core components of vehicles today have stories and engineering journeys worth their own telling, and that is what is so exciting about the way we can learn about them in this text. Dr. Beiker's curriculum vitae, from BMW to Stanford University to McKinsey, are a compendium of experiences that created this unique historical and biographical book." "Sven and I are kindred spirits in the mobility world. His view on the evolution of mobility and technology illustrates why Detroit and Silicon Valley need one another." The combination of the Audi Quattro's turbocharged engine and 4x4 drive train meant there was nothing else like it in the 1980s. The car developed into a formidable rally car. There were snags but Audi ironed these out over the years. Later Audi models using the 4x4 drive train took on the name quattro with a small initial letter. Here the articles cover the introduction, road tests, rally car tests, performance and technical data, comparison tests and buying secondhand. Models covered are: LHD, Series 1, Series 2, Rally Quattro, Treser, 80 Quattro, Treser roadster, Sport Quattro, 20v Quattro, S2.
