This volume describes the latest developments in the design, construction and operation of cyclotrons, from compact machines producing intense beams for isotope production, cancer therapy and industrial use, to the larger versions giving higher energy beams of ions of various elements for nuclear and particle physics. Important topics include ECR ion sources, superconducting magnets and radiofrequency cavities, beam dynamics and diagnostics, beam cooling rings, control systems and various medical and industrial applications.

assured. Tracing the evolution of the post-Mao auto industry through thirteen case studies, Designated Drivers raises the difficult questions about the future of China that few people have dared to ask. Offers a unique insight into the Chinese economy through the lens of the auto industry. Explores how successful the central government has been in spurring economic growth and the long-term costs of intervention. Uses case studies to illustrate China's explosive growth over the last three

decades. A painstakingly researched analysis of the Chinese automobile industry, Designated Drivers explains the risks and rewards inherent in doing business in China that anyone interested in, or already working there need to understand.
