Multi-volume major reference work bringing together histories of companies that are a leading influence in a particular industry or geographic location. For students, job candidates, business executives, historians and investors.

United States Coast Guard  
Leaders and Missions, 1790 to  
the Present Routledge  
This authoritative clinical

---

reference and text--now revised throughout with DSM-5 and updated with 50% new content--presents the assessment tools and strategies that every evidence-based psychotherapy practitioner needs. Unlike most assessment texts, the volume is organized around specific clinical problems. It explains how to select and use the best measures to assess clients' symptoms, generate diagnoses, plan appropriate treatments, and monitor progress. Clinician- and student-friendly features include tables comparing and contrasting relevant measures, sample forms, and case examples. Every chapter addresses considerations for primary and managed care settings. New to This Edition \*Chapters on new topics: assessment of well-being and transdiagnostic assessment. \*New chapters on core topics: eating disorders, personality disorders, and insomnia. \*Updated

diagnostic changes, new and updated instruments, current research, and increased attention to transdiagnostic concerns. \*Expanded coverage of obsessive-compulsive and related disorders. See also *Clinical Handbook of Psychological Disorders, Sixth Edition*, edited by David H. Barlow, which presents evidence-based treatments step by step.

Ecosystem-based, multiple-use land stewardship is necessary when considering the present and future uses of land, water, and other natural resources on an operationally efficient scale. We need holistically planned and carefully implemented watershed management practices, projects, and programs to accommodate the increasing demand for commodities and amenities, clear water, open space, and uncluttered landscapes. An international conference in Tucson, Arizona, from March 13 to 16, 2000, examined these needs and increased people's awareness of the contributions that ecosystem-based, multiple-use watershed

management can make to future land stewardship. The conference was sponsored by the School of Renewable Natural Resources, University of Arizona; the College of Agriculture, University of Arizona; the Rocky Mountain Research Station, USDA Forest Service; the Research Center for Conservation of Water Resources and Disaster Prevention, National Chung-Hsing University, Taiwan; the Department of Forest Resources, University of Minnesota; the Center for Integrated Natural Resources and Agriculture Management, University of Minnesota; the Centro de Investigaciones Biologicas del Noreste, Mexico; the International Arid Lands Consortium; the USDA Natural

Some companies discover the value of

cross-border collaborations only after fighting long, head-to-head battles that leave them financially exhausted, intellectually depleted, and vulnerable to the next wave of competition and innovation. Grudgingly they come to recognize the benefits of sharing and trading control, costs, skills, capital, information, technology and access to markets - but only after a heavy price. Now companies can begin to learn the value of collaboration and how to capitalize on strong, flexible alliances by reading Collaborating to Compete. Written by McKinsey & Company's leading international management consultants, this strategic and

---

operational guide provides powerful alliance practical information on how to design effective cross-border alliances-based on hundreds of case studies worldwide that illustrate the common factors that go into winning alliances. The authors argue that successful companies are transferring competence across borders by retaining key managers from acquired companies and by employing other strategies designed to reap the best from both companies in the consolidation. The authors also argue that effective collaboration is based on a long-term sequence of actions and that alliances fail when they're driven by hasty shortsighted goals. The authors highlight key steps in putting together a powerful alliance including: overcoming the resistance to alliances from executives and managers; finding the best structure and partner to meet a given set of goals; building flexibility into your collaboration to permit changes in legal and financial structures; ensuring good, frequent communication between you and your partners; setting up internal mechanisms to resolve conflicts quickly; and rescuing poorly conceived alliances. In reading about the activity of leading companies in the U.S., Japan, and Europe, readers will discover that even acquisitions - once a strictly predatory enterprise - are now taking on a more

---

collaborative color. Drawing on McKinsey's strategies from the Triad, *Collaborating to Compete* goes on to show why cross-border strategy approaches need to account for the unique regulatory structural, and cultural barriers presented by individual countries and regions. The book shows that by following through on the basic prescription: U.S. companies can "ally for advantage" to open up the once impenetrable Japanese market; Japanese MNCs can successfully move into those complex U.S. markets; U.S., Japan, and other countries can crack the European Economic Community; and European companies can transcend obstacles and

make successful U.S. acquisitions. *Collaborating to Compete* also looks hard at the dramatic restructuring of Europe and Asia and points out how European companies will have to use cross-border acquisitions and alliances to respond to new threats from global and Pan-European competitors.

The history of the U.S. Coast Guard and its predecessor agencies

---

dates from 1790, with missions in both domestic and international waters. The service has provided aids to navigation, enforcement of maritime laws, environmental protection, search and rescue, immigration and narcotics interdiction, maritime safety assistance, port security, natural disaster response and national defense missions, including overseas with other U.S. armed forces and federal and state public safety agencies. The Service has operated under the Department of the Treasury, the Department of Transportation and, since 2003, the Department of Homeland Security. Its maritime mission regions have included Arctic and

Antarctic waters, inland and coastal U.S. waterways and the seas and oceans of the world. This history describes how the Coast Guard has manifested its legacy and motto, *Semper Paratus* (Always Ready), in changing conditions under each of its leaders. Official Telephone Directory

This long-awaited second edition of *Manic-Depressive Illness* will exhaustively review the biological and genetic literature that has dominated the field in recent years, and incorporate cutting-edge research conducted since publication of the first edition. Drs. Frederick Goodwin and Kay Redfield Jamison have updated their surveys of psychological and epidemiological evidence, as well as that

---

pertaining to diagnostic issues, course, and outcome, and they offer practical guidelines for differential diagnosis and clinical management. This book will be a valuable addition to the libraries of psychiatrists and other physicians, psychologists, clinical social workers, neuroscientists, pharmacologists, and the patients and families who live with manic-depressive illness.
