Herbert A. Simon has been a leading contributor to cognitive psychology, computer science, public administration, philosophy and

statistics, and is the winner of the 1978 Nobel Memorial Prize in economics. As this collection demonstrates, his impact on economics has been felt in areas as diverse as the theory of the firm and economic organization, consumer behaviour, law and economics, and environmental economics. Central to his work is the notion of bounded rationality - the mismatch between human decision-making capacities and the scale of the decision problems that people face, which results in satisficing rather than optimizing behaviour - and his belief that economic research should start from the study of actual behaviour rather than being based on convenient but unrealistic assumptions. Peter Earl's choice of articles shows both the kind of economics that emerges when Simon's philosophy is followed comprehensively, and what happens when neo-classical

economists partially adopt his ideas.

Register Ford Police Cars,

1932-1997 Managing in the Modular Age

This book brings together seminal articles by leading scholars of

technological and organizational systems, exploring the impact of 'modularity'.

Modularity refers to an ability to

take apart and put together different products and networks, or to 'mix and match' components in order to meet different user

specifications.

This is of key importance today where new systems such as the World Wide Web and many areas of the computer industry depend on it. The volume pulls together and defines an exciting new area of inquiry: into how our 'modular age' is reshaping the business ecosystem. Includes contributions from leading scholars of

technology and organization
Modularity refers to an ability to take apart and put together different products and systems, or to 'mix and match' components in order to meet different user specifications.
Consolidates and defines an area of inquiry that is becoming increasingly important with the development of web-based and 'network' industries.
Sensitizes readers to the complexity of issues surrounding new modular products and systems created

by e-business
Encourages readers to make connections among different levels and disciplines.
Initiates a debate around issues of modularity.
Includes a commentary co-authored by the late Nobel Laureate Herbert A. Simon to whom the book is dedicated.
The Legacy of Herbert Simon in Economic Analysis Haynes Publishing

Read the full story of Great Britain's

best-loved sports car manufacturer with Aston Martin DB, an exquisitely produced, photo-loaded, history by Aston Martin expert, Andrew Noakes. The name David Brown is synonymous with the glory days of Aston Martin, when a tiny British sports car company was rescued from near-extinction and turned into a marque that could compete with Ferrari--and win. Stylish design, lavish illustration from the Aston Martin Heritage Trust and meticulously researched text

come together in this large-format, 224-page book to create a superb celebration of the 70th anniversary of the World Sports Car Championship, 2017. There's a wealth of detail on the Aston Martin DB road and race cars, both from the David Brown era of 1947-1972 and the modern DB era from 1993 onwards, together high quality images and specification tables for all the key models. Aston Martin DB 70 Years is a fitting celebration of one of the world's most enduring sports cars. The fast, beautiful sports

cars that Aston Martin built under Brown's ownership won the Le Mans 24-hour race and the World Sports Car Championship, and provided James Bond with his most famous transport: the ejector-seat equipped DB5 that won acclaim in Goldfinger. Though the DB era ended when Brown sold the company in 1972, its influence continued to be felt. James Bond's most recent car, the specially-made DB10, and Aston Martin has just launched its most complete car ever, the DB11. 'DB' means as much to

Aston Martin now as ever.

Popular Science

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
