This book examines the
dramatic increase in
automotive assembly
plants in the former
Socialist Central
European (CE) nations of
Czechia, East Germany,
Hungary, Poland, and
Slovakia from 1989
onwards. Enticed by
relatively lower-wage
labour and significant

government incentives, the
world's largest
automakers have
launched more than 20
passenger car assembly
complexes in CE nations,
with production
accelerating dramatically
since 2001. As a result,
the annual passenger car
production in Western
Europe declined by more
than 20% between 2001
and 2015, and
alternatively in the CEE it
increased by nearly 170%
during this period. Drawing
on case studies of 25

current and former foreign-
run assembly plants, the
author presents a rare
historical account of
automotive foreign
assembly plants in the CE
following this dramatic
geographic shift. This
book will expand the
knowledge of policy-
makers in Europe in
relation to their pursuits of
FDI and will be of great
interest to scholars and
students of business,
economic history, political
science, and development.
