A young Muslim leader's memoir of his struggles to forge an American Muslim identity Haroon Moghul was thrust into the spotlight after 9/11, becoming an undergraduate leader at New

York University's Islamic Center forced into appearances everywhere: on TV, before interfaith audiences, in print. Moghul was becoming a prominent voice for American Muslims even as he struggled with his relationship to Islam. In high school he was barely a believer and entirely convinced he was going to hell. He sometimes drank. He didn't pray regularly. All he wanted was a girlfriend. But as he discovered, it wasn't so easy to leave religion behind. To be true to himself, he needed to forge a unique American Muslim identity that reflected his beliefs and personality. *How to Be a Muslim* reveals a young man coping with the crushing pressure of a world that fears Muslims, struggling with his faith and searching for intellectual forebears, and suffering the onset of bipolar disorder. This is the story of the second-generation immigrant, of what it's like to lose yourself between cultures and how to pick up the pieces.

Obstetrics can be a particularly daunting prospect for those starting out. This book is designed for those SHOs, trainee obstetricians, trainee GPs, and medical students doing their obstetrics rotations, who find that they need a small, practical guide to dealing with the many and varied problems they will face. The chapters are arranged

chronologically, starting with early pregnancy. Following chapters chart the course of the pregnancy and labour right the way through to the post-natal visit. Throughout the book, Dr Neuberg stresses the importance of the Confidential Enquiries into Maternal Deaths and emphasizes the intensive nature of much of the specialty, the potential for sudden problems, and the constant need for vigilance. The text is supplemented by many simple line drawings to aid clarification and numerous check lists to reinforce important points. A final section has been written specifically to help candidates for the DRCOG. Obstetrics is the ideal book for everybody coming to the field. Its chronological structure means that finding information is quick and easy, the check-lists aid recall, and the text focuses on those aspects of the specialty that the physician on the ward needs in everyday practice. It is not an 'exam-crammer' but a well-written and concise guidebook to obstetrics and as such it will find a place in the library of every health worker who works with pregnant women.

This comprehensive introduction to software synthesis techniques and programming is intended for students, researchers, musicians, sound artists and enthusiasts in the field of music technology.

The art of sound synthesis is as important for the electronic musician as the art of orchestration is important for symphonic music composers. Those who wish to create their own virtual orchestra of electronic instruments and produce original sounds will find this book invaluable. It examines a variety of synthesis techniques and illustrates how to turn a personal computer into a powerful and flexible sound synthesiser. The book also discusses a number of ongoing developments that may play an important role in the future of electronic music making.

Previously published as *Computer Sound Synthesis for the Electronic Musician*, this second edition features a foreword by Jean-Claude Risset and provides new information on:

- the latest directions in digital sound representation
- advances in physical modelling techniques
- granular and pulsar synthesis
- PSOLA technique
- humanoid voice synthesis
- artificial intelligence
- evolutionary computing

The accompanying CD-ROM contains examples, complementary tutorials and a number of synthesis systems for PC and Macintosh platforms, ranging from low level synthesis

programming languages to graphic front-ends for instrument and sound design. These include fully working packages, demonstration versions of commercial software and experimental programs from top research centres in Europe, North and South America.
