published in 1990, Toyota was half the size of General Motors. Twenty years later Toyota passed GM as the world's largest auto maker. This management classic was the first book to reveal Toyota's lean production system that is the basis for its enduring success. Authors Womack, Jones, and Roos provided a comprehensive description of the entire lean system. They exhaustively documented its advantages over the mass production model pioneered by General Motors and predicted that lean production would eventually triumph. Indeed, they argued that it would triumph not just in manufacturing but in every value-creating activity from health care to retail to distribution. A penetrating indictment of how today's largest tech companies are hijacking our data, our livelihoods, our social fabric, and our minds—from an acclaimed Financial Times columnist and CNN analyst WINNER OF THE

PORCHLIGHT BUSINESS BOOK AWARD • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FOREIGN AFFAIRS AND EVENING STANDARD “Don't be evil” was enshrined as Google's original corporate mantra back in its early days, when the company's cheerful logo still conveyed the utopian vision for a future in which technology would inevitably make the world better, safer, and more prosperous.

Unfortunately, it's been quite a while since Google, or the majority of the Big Tech companies, lived up to this founding philosophy. Today, the utopia they sought to create is looking more dystopian than ever: from digital surveillance and the loss of privacy to the spreading of misinformation and hate speech to predatory algorithms targeting the weak and vulnerable to products that have been engineered to manipulate our desires. How did we get here? How did these once-scrappy and idealistic enterprises become rapacious monopolies with the power to corrupt our elections, co-opt all our data, and control the largest single chunk of corporate wealth—while

evading all semblance of regulation and taxes? In Don't Be Evil, Financial Times global business columnist Rana Foroohar tells the story of how Big Tech lost its soul—and ate our lunch. Through her skilled reporting and unparalleled access—won through nearly thirty years covering business and technology—she shows the true extent to which behemoths like Google, Facebook, Apple, and Amazon are monetizing both our data and our attention, without us seeing a penny of those exorbitant profits. Finally, Foroohar lays out a plan for how we can resist, by creating a framework that fosters innovation while also protecting us from the dark side of digital technology. Praise for Don't Be Evil “At first sight, Don't Be Evil looks like it's doing for Google what muckraking journalist Ida Tarbell did for Standard Oil over a century ago. But this whip-smart, highly readable book's scope turns out to be much broader. Worried about the monopolistic tendencies of big tech? The addictive apps on your iPhone? The role Facebook played in Donald Trump's election? Foroohar will leave

you even more worried, but a lot better informed.” —Niall Ferguson, Milbank Family Senior Fellow at the Hoover Institution, Stanford, and author of *The Square and the Tower*

An award-winning scientist offers his unorthodox approach to childrearing: " Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions " (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ' re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn

to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ' s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with

lessons that go down easy. You ' ll be laughing and learning at the same time.
