Retro Rods McFarland

While Elwood Haynes and the Apperson brothers are not as well known as Henry Ford, Ransom Olds and other famous automobile manufacturers, their contributions to the automotive industry are just as significant. They were responsible for one of the first functioning automobiles, if not the first, in the United States. After building their automobile in 1894, the three men formed the Haynes-Apperson Automobile Company in Kokomo, Indiana, one of the first car manufacturing companies in the country. Three years after incorporation, a dispute over money caused the partnership to split up and Edgar and Elmer Apperson formed their own company. Both companies lasted until the mid-1920s. This book is a history of these automotive pioneers and their companies: the Haynes-Apperson Automobile Company, the Haynes Automobile Company, and the Apperson Brothers Automobile Company. It is richly illustrated with photographs of the factories, automobiles, personalities and advertisements.

Popular Mechanics Motorbooks International

The Automobile ?????? ????????

The automobile has always symbolized freedom, and in this book we meet the first generation of female motorists who drove cars for fun, profit, and to make a statement about the evolving role of women. From the advent of the auto in the 1890s to the 1920s, when the breaking down of barriers for women was in full swing, readers will examine historical photos, art, and artifacts and to discover the many ways these women influenced fashion, the economy, politics, and the world around them.

Popular Mechanics

Contrary to the explanations offered by the theory of non-reflexive, path-dependent institutionalism, the U.S. and the German automotive industries undertook strikingly similar patterns of industry modification under tough international competition during the 1990s, departing from their traditional national patterns. By investigating the processes of the U.S. and German adjustments, the author critically reconsiders the prevalent paradigms of political economy and comes to the conclusion that the evidence does not confirm the neoliberal paradigm. In order to better account for the recomposition of new market relations, which the author terms "converging but non-liberal" and "diverging but not predetermined" markets, he proposes an alternative model of "politics among reflexive agents," emphasizing different kinds of problem-solving practices among those reflexive agents. He argues that different forms and regimes of market are established in the process of recomposition, in which agents reflect upon not only market rationality but also upon their own institutions, creating new norms.

Michigan Manufacturer & Financial Record
