Since the front rises but can't hold the air, it's a good sign that you don't have any

compressor problems. You probably hear the compressor constantly clicking on to try to keep the front end inflated. The most common cause is a leak in the air spring.

alternator wiring problem.  
My alternator is not charging  
the battery, i took the  
alternator out and had it  
tested it is good, so i then  
started to check the 4 wires  
coming from the pigtail. i cut  
back some of the harness
