Persistent Organic Pollutants (POPs) are chemicals that resist environmental

degradation and cause deleterious effects on the environment and human wellbeing. Once released into the environment they can travel long distances and persist for longer duration. This book highlights the complex area of POPs in simple language and deals with the fundamentals of the chemicals, their sources, and impacts on human health. The book also unfolds several

---

other aspects like new and advanced analytical detection methods, gaps in management, effectiveness of the Stockholm convention, and the role of the global monitoring plan on POPs for crucial and holistic understanding about POPs. It also investigates how to minimize the impact of POPs and the major gaps and challenges in sound management of POPs. With its comprehensive approach, this book is an indispensable source of knowledge for those studying and working to mitigate the effect of POPs in the environment.

TRB's National Cooperative Highway Research Program (NCHRP) Report 672: Roundabouts: An Informational Guide - Second Edition explores the planning, design, construction, maintenance, and operation of roundabouts. The report

also addresses issues that may be useful in helping to explain the trade-offs associated with roundabouts. This report updates the U.S. Federal Highway Administration's Roundabouts: An Informational Guide, based on experience gained in the United States since that guide was published in 2000.

Schizophrenia is one

mankind. It is the

most common of the

of the day to day workload of the average psychiatrist. 50% of long-term psychiatric patients in mental hospitals are schizophrenic. There is a great deal of controversy about the causes, diagnosis and treatment of schizophrenia with the consequence that a huge amount of research is carried out in the field by psychiatrists, psychologists, neuroscientists and pharmacologists. For the average practising psychiatrist seeing schizophrenics on a regular basis, making sense of the vast body of information on the subject and filtering out what is of clinical relevance can be very difficult. There is a constant stream of new drugs emerging and the new generation of drugs (the so-called atypicals) is very effective, but often expensive. The Editors (one American and one British) are both highly respected clinical psychiatrists who are probably the leading experts on schizophrenia from their respective countries and jointly have published almost 150 papers on the subject. They have brought together a strong group of contributors from the USA, UK and Europe to produce what will be an essential reference for the

---

trainee and practising psychiatrist. The book consists of four sections; descriptive aspects, causative aspects, physical treatments and psychological/behavioural/social treatments. There will be a discussion of the theoretical controversies over symptomatology, classification and aetiology, the relationship of schizophrenia to the other psychoses, the significance of positive and negative symptoms and pre-morbid personality. There will be chapters on organic models of schizophrenia, neurodevelopmental, genetic and structural studies and the role of high-expressed emotion. The final section will cover social and environmental treatment, the role of the families of schizophrenics and the psychoanalytical therapies. There is a new chapter on the patient's perspective written by a former patient.

 Using humor and frank candor, author Basil Donovan Warren shares his personal experience, as well as that of his fellow tankers, as part of the US Army's 3d Armored Cavalry Regiment (the "Brave Rifles") in Saudi Arabia and Iraq. Warren recounts the initial shock of hearing about Iraq's invasion of Kuwait and his Regiment's preparation for deployment during

---

Operation Desert Shield. He describes the stress and sometimes mind-numbing boredom of being deployed deep in the desert of Saudi Arabia, constantly preparing for a possible Iraqi invasion. He recalls the terrifying experience of the start of the air war of Operation Desert Storm and the workmanlike action during combat against Iraq's Republican Guard forces during Operation Desert Sabre. *With It or in It* brings clarity and focus to their unceasing efforts to bring the conflict to a swift and decisive end. Finally, Warren describes the triumphant return of the Brave Rifles to Ft. Bliss, Texas, and the waiting arms of their families and loved ones.

"[This book] is a study of

America's most controversial personal automobile. Featuring more than fifteen essays, this collection analyzes the Hummer through a wide array of disciplines. The editors, Elaine Cardenas and Ellen Gorman, have divided the essays into four groups: myth and space, myth and body, myth and discourse, and myth as vehicle. An introduction by the editors places the study of the Hummer in a cultural context." -- from cover, page 4.

Encyclopedia of Mental Health, Second Edition, Four Volume Set tackles the subject of mental health, arguably one of the biggest issues facing modern society. The book presents a comprehensive overview of the many genetic, neurological, social, and psychological factors that affect mental health, also describing the impact of

---

mental health on the individual and society, and illustrating the factors that aid positive mental health. The book contains 245 peer-reviewed articles written by more than 250 expert authors and provides essential material on assessment, theories of personality, specific disorders, therapies, forensic issues, ethics, and cross-cultural and sociological aspects. Both professionals and libraries will find this timely work indispensable. Provides fully up-to-date descriptions of the neurological, social, genetic, and psychological factors that affect the individual and society. Contains more than 240 articles written by domain experts in the field. Written in an accessible style using terms that an educated layperson can understand. Of interest to public as well as research libraries with coverage of many important topics, including marital health, divorce, couples therapy, fathers, child custody,

day care and day care providers, extended families, and family therapy. Road Report 2000 National Academies Press. Though American Motors never approached the size of Detroit's Big Three, it produced a long series of successful cars that were distinctive, often innovative and in many cases influential. This history examines AMC's cars from the company's formation in 1954 through its absorption by Chrysler in 1987. The Gremlin, Pacer and Eagle vehicles are examined in detail, as are the AMC custom cars of George Barris and Carl Green. The text details AMC's 1980s involvement with the French firm Renault and the design legacy of that joint venture, which includes the Hummer. The evolution of Jeep is covered from the 1960s through the 2000s. Features include some 225 photographs; a listing of AMC

Mental Health: A Report of the Surgeon General, 1999 DIANE Publishing

Historically, regulations governing chemical use have often focused on widely used chemicals and acute human health effects of exposure to them, as well as their potential to cause cancer and other adverse health effects. As scientific knowledge has expanded there has been an increased awareness of the mechanisms through which chemicals may exert harmful effects on human health, as well as their effects on other species and ecosystems.

Identification of high-priority chemicals and other chemicals of concern has prompted a growing

number of state and local governments, as well as major companies, to take steps beyond existing hazardous chemical federal legislation. Interest in approaches and policies that ensure that any new substances substituted for chemicals of concern are assessed as carefully and thoroughly as possible has also burgeoned. The overarching goal of these approaches is to avoid regrettable substitutions, which occur when a toxic chemical is replaced by another chemical that later proved unsuitable because of persistence, bioaccumulation, toxicity, or other concerns. Chemical alternative assessments are tools designed to facilitate consideration of these factors to assist stakeholders in identifying chemicals that may have the greatest likelihood of harm to human and ecological health, and to provide guidance on how the industry may develop and adopt safer alternatives. A Framework to Guide Selection of Chemical Alternatives develops and demonstrates a decision framework for evaluating

---

potentially safer substitute chemicals as primarily determined by human health and ecological risks. This new framework is informed by previous efforts by regulatory agencies, academic institutions, and others to develop alternative assessment frameworks that could be operationalized. In addition to hazard assessments, the framework incorporates steps for life-cycle thinking - which considers possible impacts of a chemical at all stages including production, use, and disposal - as well as steps for performance and economic assessments. The report also highlights how modern information sources such as computational modeling can supplement traditional toxicology data in the assessment process. This new framework allows the evaluation of the full range of benefits and shortcomings of substitutes, and examination of tradeoffs between these risks and factors such as product functionality, product efficacy, process safety, and resource use. Through case studies, this report demonstrates how different users

in contrasting decision contexts with diverse priorities can apply the framework. This report will be an essential resource to the chemical industry, environmentalists, ecologists, and state and local governments. Persistent Organic Pollutants

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as

---

the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

between the criminal justice system and victims today. With It Or in It Firefly Books This account of the Khobar Towers bombing tells the story of the horrific attack and the magnificent response of airmen doing their duty under nearly impossible circumstances. None of them view their actions as heroic, yet the reader will marvel at their calm professionalism. All of them say it was just their job, but the reader will wonder how they could be so well trained to act almost instinctively to do the right thing at the right time. None of them would see their actions as selfless, yet countless numbers refused medical attention until the more seriously injured got treatment. Throughout this book, the themes of duty, commitment, and devotion to comrades resoundingly underscore the notion that America's brightest, bravest,

and best wear her uniforms in service to the nation. This book is more than heroic actions, though, for there is also controversy. Were commanders responsible for not adequately protecting their people? What should one make of the several conflicting investigations following the attack? Dr. Jamieson has not shied away from these difficult questions, and others, but has discussed them and other controversial judgments in a straightforward and dispassionate way that will bring them into focus for everyone. It is clear from this book that there is a larger issue than just the response to the bombing. It is the issue of the example set by America's airmen. Future airmen who read this book will be stronger and will stand on the shoulders of those who suffered and those who made the ultimate sacrifice.

The second edition will be an update and further elaboration of the literature related to subjective well-being, happiness, and life satisfaction. It will have a new substantial section that focuses on reviewing much of the literature of subjective well-being within specific life domains (social life,

---

material life, leisure life, work life, community life, spiritual life, family life, health life, sex life, travel life, etc.) In the 1st edition the research in these various life domains was discussed only briefly. The second edition will maintain the same organizational structure of the first edition; that is, Part 1 will focus on introduction (definitions and distinctions; examples of measures of subjective well-being, happiness, and life satisfaction; and motives underlying subjective well-being). Part 2 will focus on psychological strategies that are allow people to optimize subjective well-being by engaging in psychological processes related to the relationship between and among life domains (e.g., social life, family life, love life, spiritual life, community life, financial life, etc.) This part will contain four chapters related to these various “ inter-domain ” processes: bottom-up spillover, top-down spillover, horizontal spillover, and compensation. Part 3 of the book will focus on “ intra-domain ” psychological strategies designed to optimize subjective well-being.

These include re-evaluation based on personal history, re-evaluation based on self-concept, re-evaluation based on social comparison, goal selection, goal implementation and attainment, and re-appraisal. Part 4 of the book will focus on balance processes—how people attempt to create balance in their lives using psychological processes within specific life domains (intra-domain strategies) and processes that relate one domain to another (inter-domain strategies).

The Sage Handbook of Sociology of Education is an international and comprehensive groundbreaking text that serves as a touchstone for researchers and scholars interested in exploring the intricate relationships between education and society.

Leading sociologists from five different continents examine major topics in sociology from

a global perspective. This timely, thought-provoking Handbook features contributions from leading and emerging sociology scholars, who provide their own cultural and historical perspectives on diverse—yet universal—topics; these include educational policy, social stratification, and cross-national research. 39 Chapters delve into the pressing issues faced by our global society, such as the effects of residential mobility on educational outcomes, gender and ethnic inequalities, and the impact of COVID-19 on early childhood education. Readers will gain a multifaceted view of the contours of educational inequality, from various international perspectives and focusing on country differences, as well as recommendations for expanding the practices, programs, and policies that could reduce the rising tide of
