The Homecoming Haynes Manuals N. America, Incorporated

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids

show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Toyota Corolla, 1980-1987 Haynes Manuals N. America, Incorporated

A new, emotional novel from Stacie Ramey, the author of *The Sister Pact* They say you can never go home-and John's about to find out just how true that is. John's mother kicked him out of the house when she couldn't handle his anger, and John's spent the last few years bouncing between relatives. But after his last scrape with the law, there's nowhere for him to go but home. Starting senior year at a new high school and fitting into the family that shut him out is a challenge. And it's all that John can do to keep from turning back to bad habits. Lacrosse training helps him focus. As does Emily, the girl next door. She's sweet and smart, and makes him think his heart may finally be healing. Maybe he's ready to trust again. But tragedy has a way of finding John, and he must decide between saving his family or saving himself. "A powerful story of redemption, forgiveness, love, and the ability to persevere."-VOYA on *The Sister Pact*

This author has written a straight forward, no holds barred, accounting of his struggle, and his reaction to a diagnosis of prostate cancer. He was astonished to learn that he, a medical neophyte, would have the task of making the treatment decision himself. This journal takes the reader through more than four years of his extensive emotional ups and downs as he shares, in detail, his experiences in this effort to win his battle.

The CLOCK REPAIRER'S MANUAL CarTech Inc

A truly classic air pollution text, this book is suitable for a variety of engineers and scientists who wish to gain an introduction to the field of air pollution. Known for its detailed development and application of equations, the text emphasizes an understanding of the relationship between sources and control of air pollution, rather than being a simple handbook on the subject. The book presents information on four broad areas of interest in the air pollution field: the effects of pollutants on health and welfare; the laws and regulations that have been passed in efforts to improve air quality; the modeling of atmospheric dispersion of pollutants; the approaches to the control of emissions (from both stationary and mobile sources). The third edition of this text has been modified in a number of ways. New material has been added to bring the text up to date on the latest regulations including the Clean Air Act Amendments of 1990. The latest standards for ambient air quality and emission have been included in this revision. The authors continue to expose students to both the quantitative and the qualitative aspects of air quality management and air pollution control with several new questions and problems, with SI units emphasized to a greater extent than in the previous edition. The internet is also introduced as a valuable source of additional information. A web page is maintained by the authors which provides links to sources of interest to both instructors and students.
