Maximize the potential of your 2011 – 2014 Mustang with this new book! The Ford Mustang has seen quite an evolution in its 50-plus years of existence. Times change, consumer demands change, and sometimes, you stop and wonder, "How did we get here?" Ford ' s designers and its customers were thinking the same thing in the early 2000s. The evolution from the classic original design to the New Edge styling of the 1999 – 2004 models had some scratching their heads. Ford decided to take a bold turn back to the Mustang ' s roots with the fifth-generation model, which made its debut for the 2005 model year and lasted through 2014. Echoing the Mustang fastback design of the 1960s, Ford inspired a path of retro design that the Camaro and Challenger followed shortly thereafter. The move proved incredibly popular with enthusiasts. Of course, with car enthusiasts, the immediate thought was, "How can we make this new Mustang even better?" The big news in 2011 was the introduction of the new 5.0-liter Coyote engine, which was a huge upgrade over the previous 4.6-liter engine. In Ford Mustang 2011 – 2014: How to Build and Modify, Mustang expert Wes Duenkel takes you through the entire car, system by system, to explore ways to get more performance out the last of the fifth-generation Mustangs. Included are chapters on engine modifications, brake and exhaust upgrades, power adders, chassis and suspension upgrades,

cooling system modifications, and EFI and tuning tips. Wheels and tires, differentials, electronic upgrades, and more are also covered. The 2011 – 2014 Mustangs are finding their way into the affordable category at present with warranties expiring and acquisition costs being very reasonable. Of course, as with all generations of Mustang, there is a robust aftermarket to explore for performance parts and accessories. Ford Mustang 2011 – 2014: How to Build and Modify covers it all and will help you make your Mustang everything you want it to be.

Ford Mustang 2005 thru 2014

By the time the 1969 model year rolled around, it was well established that muscle cars were fast and plentiful. Every manufacturer had at least one corner of the showroom where the "go fast" guys could congregate and discuss the merits and time slips of the latest performance offerings. Competition being what it was, the manufacturers were looking for ways to entice potential buyers to choose their product over ever-increasing offerings from the competition. Some manufacturers tried to accomplish this with affordable prices, some tried fancy marketing schemes, and some created a look and a style that screamed "performance" even when standing still. The 1969 Mach I was Ford's attempt to create a package and a style to match the

performance of its recently released and very potent 428-ci Cobra Jet engine package. Displacing the still-available but more conservative GT trim, the Mach I included unique and innovative graphics and mechanical innovations including shaker hood scoops, dual racing mirrors, deluxe interiors, competition suspension, dual chrome exhaust tips, and blacked-out hoods. The result was a wildly popular model that sold more than 70,000 units, compared to slightly more than 5,000 GT models for the year. Each volume in the In Detail Series provides an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, an in-depth study of all hardware and available options, and an examination of where the car is on the market today. Also included are paint and option codes, VIN and build tag decoders, as well as production numbers.
