Cold case investigators scrape back paint in a renovated flat where a murder was committed twelve years earlier, and find a blood stain that leads them to a killer. Scientists extract DNA from crime-scene samples collected in 1973, and a 21st-century hunt for a triple murderer begins. A forensic dentist probes the mysterious death of an ancient Egyptian mummy. A long-forgotten palm print leads detectives to the real perpetrator of a murder for which an innocent man has already served 12 years' jail. In this collection of fascinating cold cases from Australia, the UK and the US, award-winning writer Liz Porter shows how modern forensic science can unlock solutions for crimes and mysteries unsolved for decades, and, in some cases, centuries. Praise for Liz Porter: "...each of her stories reads like good crime fiction... a compulsive read" - The Sydney Morning Herald "A delightful and entertaining writer..." - Weekend Australian Winner of Davitt Award for Best True Crime 2011

Transportation Network Companies and Taxis: The Case of Seattle is a modern economic case history and thorough analysis of the devastating impact of the transportation network company (TNC) industry (Uber and Lyft) on the taxicab industry in Seattle, Washington, beginning in 2014. The events that transpired and lessons learned are applicable to most large cities in North America, Europe and Australia. As the regulator of the taxicab and TNC industries in Seattle during this period, the author offers a unique insider perspective. The book also provides internal operating statistics on the TNC industry, which are available here for the first time. Despite the spectacular growth of the TNC industry, growth rates have steadily declined and may fall to zero by 2019 or 2020, while the taxicab industry appears to have begun a modest recovery. This book offers a thorough explanation of how and why this decline has happened. It explains the taxicab industry, economic deregulation, competitive market failure, market disruption, price elasticity of demand and other concepts. There is also a wealth of data, computations and analysis for the specialized reader. This book considers the past, present and future of the taxicab and TNC industries in Seattle. It is recommended for both the general reader and industry professionals.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash

Lemon-Aid Used Car Guide 1996 Canbooks

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality.
