How do the rich get rich? An updated edition of the “remarkable” New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don’t live in Beverly Hills or on Park Avenue. They live next door. America’s wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don’t realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as “rich” are actually a tiny minority of America’s truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America’s rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. “Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today’s earn-and-consume culture.” —Library Journal

*Human Factors of Visual and Cognitive Performance in Driving* Springer Science & Business Media

Human error is involved in more than 90 percent of traffic accidents, and of those accidents, most are associated with visual distractions, or looking-but-failing-to-see errors. *Human Factors of Visual and Cognitive Performance in Driving* gathers knowledge from a human factors psychology standpoint and provides deeper insight into traffic-user behavior and the ways drivers acquire information from the road. Emphasizes Drivers as Visual Information Processors Because driving is an eyes-wide-open task, drivers are exposed to a multitude of visual stimuli along their journey. This information must be correctly processed in order to make the right decisions and perform precise safety maneuvers. With contributions from more than 20 leading experts, this detailed resource discusses road and markings design, new technologies, signage, distraction, safety, situation awareness, workload, driving experience, fatigue, and driving interventions with the goal of improving driving behavior and preventing accidents. Addresses These Key Areas: Visual attention and in-vehicle technologies Interventions to reduce road trauma Avoiding collisions and the failures involved in that endeavor Using jargon-free language that is easily understood, this book compresses research from the past few decades into one accessible resource. It clearly and cohesively provides ergonomics and human factor engineers, industrial designers, and highway and roadway engineers with an overarching understanding of the incessant visual demands drivers face.

Spoof letter writing has a long history from Lazlo Toth to Henry Root but nothing can prepare you for the uniquely surreal and endearing world of Ted L Nancy. A kind of Trigger Happy correspondence, his innocent requests, queries, complaints, demands and suggestions to hotels, airlines, multi-national corporations, local government and department stores are so absurd it is amazing they fool anyone - but often the deadpan responses are even more hilarious. Ted wants to know if he can graft his big toe onto his nose, why his wife left him while he was in a coma for another man in a coma, and if he can consummate his marriage in the administrative office of the chapel. He writes to hotels telling them he eats his mattress. He writes to casinos to ask if his band the 'Fat Beatles' can perform and if he can stay in their hotel dressed as a bladder. Utterly addictive and wet-yourself-in-a-public-place funny: Dear Business Permits Dept: I want to apply for a business permit in your fine city... I operate the SOUP & SLEEP RESTAURANTS. You can either order soup or sleep. A hostess will greet you and you would say, "I'd like to sleep." She will lead you to a table where you can catch a few winks. Dear Helena Ocean & Dog Licensing Dept: I will stage the play "MARK

TWAIN WITH TOURETTE'S SYNDROME."... Let me know what arrangements I need to make to store my anchovy tank at your seaport. Thank you. I await large crowds.

The formative years of the 1950s are explored in this fourth installment of Evro's decade-by-decade series covering all Formula 1 cars and teams. When the World Championship was first held in 1950, red Italian cars predominated, from Alfa Romeo, Ferrari and Maserati, and continued to do so for much of the period. But by the time the decade closed, green British cars were in their ascendancy, first Vanwall and then rear-engined Cooper playing the starring roles, and BRM and Lotus having walk-on parts. As for drivers, one stood out above the others, Argentine Juan Manuel Fangio, becoming World Champion five times. Much of the fascination of this era also lies in its numerous privateers and also-rans, all of which receive their due coverage in this complete work. Year-by-year treatment covers each season in fascinating depth, running through the teams -- and their various cars -- in order of importance. Alfa Romeo's supercharged 11/2-litre cars dominated the first two years, with titles won by Giuseppe Farina (1950) and Fangio (1951). The new marque of Ferrari steamrollered the opposition in two seasons run to Formula 2 rules (1952-53), Alberto Ascari becoming champion both times, and the same manufacturer took two more crowns with Fangio (1956) and Mike Hawthorn (1958). Maserati's fabulous 250F, the decade's most significant racing car, propelled Fangio to two more of his five championships (1954 and 1957). German manufacturer Mercedes-Benz stepped briefly into Formula 1 (1954-55) and won almost everything with Fangio and up-and-coming Stirling Moss. Green finally beat red when the Vanwalls, driven by Moss and Tony Brooks, won the inaugural constructors' title (1958). Then along came Cooper, rear-engine pioneers, to signpost Formula 1's future when Jack Brabham became World Champion (1959).

Former Hollywood sitcom writer and funny girl Andrea R. Frazer thought she had it all: a hunky husband, two gorgeous kids, a house in the 'burbs . . . but when her son was diagnosed with Tourette Syndrome, a disorder that causes uncontrollable tics and twitches, her fantasy life imploded. Terrified, she feared he would bark, scream and curse in circle time. Turns out the only person who barked, screamed and cursed was Andrea, as she went head-to-head with this confusing condition. From diet to meds, shrinks to therapists, Frazer has written a no-holds-barred mom-moir about the realities of raising a kid on the spectrum. It isn't always pretty, but it's real, and if you're as scared as she was, clarity can look pretty darn gorgeous. Written with humor, transparency and most importantly, hope, it's Andrea's desire that this book will hold the hand of every special needs parent. "May it whisper in your ear, 'You did not cause this condition. Stop blaming yourself. You are not alone.' And while you're at it, eat a taco. Life is better with a little food. (Trust me on this one.)" ~ Andrea

The movie industry is changing rapidly, due in part to the adoption of digital technologies. Distributors now send films to theaters electronically. Consumers can purchase or rent movies instantly online and then watch them on their high-definition televisions, their laptops, or even their cell phones. Meanwhile, social media technologies allow independent filmmakers to raise money and sell their movies directly to the public. All of these changes contribute to an " on-demand culture, " a shift that is radically altering film culture and contributing to a much more personalized viewing experience. Chuck Tryon offers a compelling introduction to a world in which movies have become digital files. He navigates the complexities of digital delivery to show how new modes of access—online streaming services like YouTube or Netflix, digital downloads at iTunes, the popular Redbox DVD kiosks in grocery stores, and movie theaters offering digital projection of such 3-D movies as Avatar—are redefining how audiences obtain and consume motion picture entertainment. Tryon also tracks the reinvention of independent movies and film festivals by enterprising artists who have built their own fundraising and distribution models online. Unique in its focus on the effects of digital technologies on movie distribution, On-Demand Culture offers a corrective to address the rapid changes in the film industry now that movies are available at the click of a button.
