California Farmer CarTech Inc
Since 1991, the popular and highly
modifiable Ford 4.6-liter has
become a modern-day V-8
phenomenon, powering everything
from Ford Mustangs to hand-built
hot rods and the 5.4-liter has
powered trucks, SUVs, the Shelby
GT500, and more. The wildly
popular 4.6-liter has created an
industry unto itself with a huge
supply of aftermarket high-
performance parts, machine
services, and accessories. Its
design delivers exceptional
potential, flexibility, and
reliability. The 4.6-liter can be
built to produce 300 hp up to
2,000 hp, and in turn, it has
become a favorite among
rebuffers, racers, and high-
performance enthusiasts.

4.6-/5.4-Liter Ford Engines: How
to Rebuild expertly guides you
through each step of rebuilding a
4.6-liter as well as a 5.4-liter
engine, providing essential
information and insightful detail.
This volume delivers the complete
nuts-and-bolts rebuild story, so
the enthusiast can professionally
rebuild an engine at home and

achieve the desired performance
goals. In addition, it contains a
retrospective of the engine family,
essential identification
information, and component
differences between engines made at
Romeo and Windsor factories for
identifying your engine and
selecting the right parts. It also
covers how to properly plan a
4.6-/5.4-liter build-up and choose
the best equipment for your
engine's particular application. As
with all Workbench Series books,
this book is packed with detailed
photos and comprehensive captions,
where you are guided step by step
through the disassembly, machine
work, assembly, start-up, break-in,
and tuning procedures for all
iterations of the 4.6-/5.4-liter
engines, including 2-valve and
3-valve SOHC and the 4-valve DOHC
versions. It also includes an easy-
to-reference spec chart and
suppliers guide so you find the
right equipment for your particular
build up.

This book contains information necessary to the proper handling and care of your Ford car. Read it carefully—particularly the instructions on lubrication, the cooling system, care of battery, etc., which are absolutely necessary to economical and satisfactory operation. Your car is a splendid piece of machinery. If properly cared for, it will give you years of satisfactory service at little cost. When repairs are needed, we recommend having the work done by an authorized Ford dealer. They are provided with special service equipment. Furthermore they are interested, more than any one else, in your personal satisfaction with the car. Let experienced mechanics make repairs or adjustments. Your car is too valuable a piece of machinery to place in unskilled hands. Expert workmanship is just as essential in servicing your car as it is in building it.

4.6L & 5.4L Ford Engines Haynes Manuals N. America, Incorporated

By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort.

Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Accidental Sailor Girl is a story about a young girl named Kourtney and her journey from starting out with only her car and a surfboard to sailing across the Atlantic on a Gaff Rigged Cutter with a Square Sail named Norna. The story moves from her hardships of living on the beach to buying her first sailboat, a 27 foot Hunter she named

"Happy." Her attitude toward learning how to sail and how to fix up her boat led her to meet Pete Grundvig, a local carpenter and shipwright, the owner of Norna. Their relationship with surfing, sailing, and music, moved them to the tune of a two year Atlantic Circumnavigation. Kourtney soon realizes she is not the same person she was when she left home two years before.
