From *The Brothers Karamazov* to *Star Trek* to *Twin Peaks*, this collection explores a variety of different imaginary worlds both historic and contemporary. Featuring contributions from an interdisciplinary and international group of scholars, each essay looks at a particular imaginary world in-depth, and world-building issues associated with that world. Together, the essays explore the relationship between the worlds and the media in which they appear as they examine imaginary worlds in literature, television, film, computer games, and theatre, with many existing across multiple media simultaneously. The book argues that the media

incarnation of a world affects world structure and poses unique obstacles to the act of world-building. The worlds discussed include *Nazar*, *Barsetshire*, *Skotopogonievsk*, the *Vorkosigan Universe*, *Grover's Corners*, *Gormenghast*, *Collinsport*, *Daventry*, *Dune*, the *Death Gate Cycle* universe, *Twin Peaks*, and the *Star Trek* galaxy. A follow-up to Mark J. P. Wolf's field-defining book *Building Imaginary Worlds*, this collection will be of critical interest to students and scholars of popular culture, subcreation studies, transmedia studies, literature, and beyond.

TRB's Transit Cooperative Research Program (TCRP) Report 95: *Traveler Response to Transportation System Changes*, Chapter 19 - Employer and Institutional TDM Strategies pair-

uses wise comparisons to explore the relative importance of particular categories of TDM strategies, such as support versus incentives, as well as the particular strategies themselves, such as transit subsidy versus a high-occupancy vehicle parking discount. TDM (transportation demand management or travel demand management) is a process that can encompass a variety of measures intended to influence travel choices. TDM is used to manage heavy traffic demand and parking requirements, and to enhance the effectiveness of transit services. This report is part of TCRP's Traveler Response to Transportation System Changes Handbook series. The overarching objective of the Traveler Response to Transportation System Changes Handbook is to equip members of the transportation profession with a comprehensive, readily accessible, interpretive documentation of results and experience obtained across the United States and elsewhere from (1) different types of transportation system changes and policy actions and (2) alternative

land use and site development design approaches. The Handbook, organized for simultaneous print and electronic chapter-by-chapter publication, treats each chapter essentially as a stand-alone document. Each chapter includes text and self-contained references and sources on that topic. The Handbook user should, however, be conversant with the background and guidance provided in TCRP Report 95: Chapter 1, Introduction. Upon completion of the Report 95 series, the final Chapter 1 publication will include a CD-ROM of all 19 chapters.
