When it comes to their personal transportation, today's youth have shunned
the large, heavy performance cars of their parents' generation and instead
embraced what has become known as the "sport compact"--smaller,
lightweight, modern sports cars of predominantly Japanese manufacture.
These cars respond well to performance modifications due to their light
weight and technology-laden, high-revving engines. And by far, the most
sought-after and modified cars are the Hondas and Acuras of the mid-'80s to
the present. An extremely popular method of improving vehicle performance
is a process known as engine swapping. Engine swapping consists of
removing a more powerful engine from a better-equipped or more modern
vehicle and installing it into your own. It is one of the most efficient and
affordable methods of improving your vehicle's performance. This book
covers in detail all the most popular performance swaps for Honda Civic,
Accord, and Prelude as well as the Acura Integra. It includes vital
information on electrics, fit, and drivetrain compatibility, design
considerations, step-by-step instruction, and costs. This book is must-have
for the Honda enthusiast.

Mini Down Under traces the history of one of New Zealand's -
and the world's - best-loved cars. More versions of the Mini were
available in New Zealand than anywhere else, and the launching
of the iconic car in February 1960 was a larger-than-life event. In
this lively and personal story, the author tracks the Mini's life in
New Zealand, the connection between Kiwi racing driver Bruce
McLaren and the birth of the Mini Cooper, the heady days of
competition success in the Antipodes, the local assembly and
marketing of the classic original car and the eventual development
into the latest generation Mini for a new century.
