This book explores the causes, progression and consequences of the

extraordinary spread of anti-Jewish violence and mass conversion across five separate Spanish polities in 1391, from Seville to the Pyrenees, overwhelming Valencia, Barcelona and numerous other locations.

Using comparative analysis with previous outbreaks in Spain and elsewhere, it demonstrates the uniqueness of these events in terms of the speed and extent of transmission of attacks, and their lasting consequences. It argues that models of social contagion best explain this pandemic violence, in which latent hostilities, fears and uncertainties in the post-Black Death world, national and local tensions, were almost spontaneously triggered into often annihilatory riots by rapid communication and movement of people, spreading ideas, news, gossip and rumour through a variety of social networks. It seeks to

demonstrate the modes by which polemic and tropes were translated into action, by local preachers, poetry, troubadours and the visual arts.

*The Contagion of Violence* SAGE

Publications

Experienced

commanders discuss anecdotes and case studies from their past operations.

*Car and Driver* John Wiley & Sons

How do individual differences interact with situational factors to shape social behavior? Are people with certain traits more likely to form lasting marriages; experience test-taking anxiety; break the law; feel optimistic about the future? This handbook provides a comprehensive, authoritative examination of the full range of

personality variables associated with interpersonal judgment, behavior, and emotion. The contributors are acknowledged experts who have conducted influential research on the constructs they address. Chapters discuss how each personality attribute is conceptualized and assessed, review the strengths and limitations of available measures (including child and adolescent measures, when available), present important findings related to social behavior, and identify directions for future study.

**Lemon-Aid Used Cars and Trucks 2010-2011** Springer Nature

"TRB's National Cooperative Highway Research Program (NCHRP) Report 600C, Human Factors Guidelines for Road Systems, Collection C--including Chapters 16, 17, 18, 19, 20, 22 (Tutorials 4, 5, 6), 23 (Updated), 24, 25, 26 (Updated)--explores human factors principles and findings for consideration by highway designers and traffic engineers. The report is designed to help the nonexpert in human factors to consider more effectively the roadway user's capabilities and limitations in the design and operation of highway facilities. NCHRP Report 600A

(Chapters 1 through 5, 10, 11, 13, 22 [Tutorials 1 and 2], 23, and 26); and NCHRP Report 600B (Chapters 6, 22 [Tutorial 3], and 23 [Updated]) are available online. Additional chapters, to be developed under NCHRP Project 17-41 according to the priorities established by the project panel, are expected in late 2010"--Publisher's description. *FM 21-11 First Aid for Soldiers* Guilford Publications Winner of the 2022 Textbook & Academic Authors Association's The McGuffey Longevity Award In *Brain & Behavior: An Introduction to Behavioral Neuroscience*, authors Bob Garrett and Gerald Hough showcase the ever-expanding body of research into the biological foundations of human behavior through a big-picture approach. With thought-provoking examples and a carefully crafted, vibrant visual program, the text allows any student to appreciate the importance and relevance of this field of study. New features to the Sixth Edition include fully revised learning objectives, a streamlined box feature program, an expanded collection of foundational animations, and updated research on timely topics such as drugs and addiction, sex and gender, and emotions and health. This title is accompanied by a complete teaching and learning package. Digital Option / Courseware SAGE Vantage is an intuitive digital platform that delivers this text's content and

course materials in a learning experience that offers auto-graded assignments and interactive multimedia tools, all carefully designed to ignite student engagement and drive critical thinking. Built with you and your students in mind, it offers simple course set-up and enables students to better prepare for class. Assignable Video with Assessment Assignable video (available with SAGE Vantage) is tied to learning objectives and curated exclusively for this text to bring concepts to life. LMS Cartridge Import this title's instructor resources into your school's learning management system (LMS) and save time. Don't use an LMS? You can still access all of the same online resources for this title via the password-protected Instructor Resource Site.

*North American Bird Banding Manual* Pantheon

"In principle, venture capital is where the ordinarily conservative, cynical domain of big money touches dreamy, long-shot enterprise. In practice, it has become the distinguishing big-business engine of our time...[A] first-rate history." —New Yorker "An excellent and original economic history of venture capital." —Tyler Cowen, *Marginal Revolution* "It is an article of faith that ready access

---

to venture capital makes an economy more dynamic. Nicholas frames the case historically.”  
—Wall Street Journal “A detailed, fact-filled account of America’s most celebrated moneymen.”  
—New Republic VC tells the riveting story of how the venture capital industry arose from America’s longstanding identification with entrepreneurship and risk-taking. Whether the venture is a whaling voyage setting sail from New Bedford (as in VC’s infancy) or the latest Silicon Valley startup, VC is a state of mind as much as a way of doing business, exemplified by an appetite for seeking extreme financial rewards, a tolerance for failure and experimentation, and a faith in the promise of innovation to generate new wealth. Tom Nicholas’s authoritative history takes us on a roller coaster of entrepreneurial successes and setbacks. It describes how iconic firms like Kleiner Perkins and Sequoia invested in Genentech and Apple as it tells the larger story of VC’s birth and evolution, revealing along the way

why it is such a quintessentially American institution—one that has proven difficult to recreate elsewhere.  
**F&S Index United States Annual** Viking Canada First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, "marked a real turning point . . . and proved that a war can be won by airpower alone." Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower—the members of the 40th Expeditionary Operations Group. Their descriptions—a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot—provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to

capitulate.  
**Marketing Intellicochoice Incorporated**  
A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got

---

too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

Successful Aging Harvard University Press

Almost 25 years have passed since the *Demography of Aging* (1994) was published by the National Research Council. *Future Directions for the Demography of Aging* is, in many ways, the successor to that original volume. The Division of Behavioral and Social Research at the National Institute on Aging (NIA) asked the National Academies of Sciences, Engineering, and Medicine to produce an authoritative guide to new directions in demography of aging. The papers published in this report were originally presented and discussed at a public workshop held in Washington, D.C., August 17-18, 2017. The workshop discussion made evident that major new advances had been made in the last two decades, but also that new trends and research directions have emerged that call for innovative conceptual, design, and measurement

approaches. The report reviews these recent trends and also discusses future directions for research on a range of topics that are central to current research in the demography of aging. Looking back over the past two decades of demography of aging research shows remarkable advances in our understanding of the health and well-being of the older population. Equally exciting is that this report sets the stage for the next two decades of innovative research—a period of rapid growth in the older American population.

Humvee at War [www.Militarybookshop.CompanyUK](http://www.Militarybookshop.CompanyUK)  
From the Abrams M1 tank to the zeppelin, this essential reference details the invention and evolution of nearly 600 of the most important advances in military technology from prehistory to the present. International in scope, it covers weapons, ammunition, defenses, land vehicles, aircraft, ships, detection, stealth, gear, supplies, weapons of mass destruction, and much more. Whether researching such cutting-edge technologies as the B-2 Stealth Bomber, Patriot Missile, and the Roborat project or such historical topics as forts, Molotov cocktails, or the U-2, *Encyclopedia of*

*Military Technology and Innovation* is a must-have reference. Warfare and national defense have provided a strong stimulus for technological advances throughout history. This reference provides students and researchers from high school through college, scholars, and the general public essential information, historical perspective, and scientific context to understand better the development, capabilities, and uses of major military technologies. Fifty illustrations, helpful cross-references, a bibliography, and an index help users navigate this reference and supplement their research.

The Harbour Report  
Edmund Publications Corporation

One of the most remarkable mechanized campaigns of recent years pitted the brutal and heavily armed jihadis of Islamic State against an improvised force belonging to the Kurdish YPG (later the SDF). While some Kurdish vehicles were originally from Syrian Army stocks or captured from ISIS, many others were extraordinary homemade AFVs based on truck or digger mechanicals, or

---

duskas, the Kurds' version of the technical. Before US air power was sent to Syria, these were the Kurds' most powerful and mobile weapons. Co-written by a British volunteer who fought with the Kurds and an academic expert on armoured warfare, this study explains how the Kurds built and used their AFVs in the war against 'Daesh', and identifies as far as possible which vehicles took part in major battles, such as Kobane, Manbij and Raqqa. With detailed new artwork depicting the Kurds' range of armour and many previously unpublished photos, this is an original and fascinating look at modern improvised mechanized warfare.

*Lemon Aid Guide 2003 SUVs, Vans and Trucks*  
Bloomsbury Publishing

"This illustrated history of electric and hybrid vehicles covers the companies that produced various models; the politics that have surrounded them; the environmental aspects of electric and hybrid vehicles versus internal combustion engines; efforts to overcome technological challenges associated with electric vehicles; marketing strategies through the

decades; and public attitudes towards these vehicles throughout their existence"--Provided by publisher.

**Transportation Energy Data Book** Transportation Research Board

Speeding is the number one road safety problem in a large number of OECD/ECMT countries. It is responsible for around one third of the current, unacceptably high levels of road fatalities.

Speeding has an impact not only on accidents but also on the ...

*Speed Management*

Penguin

FM 21-11 1943: Basic field manual, first aid for soldiers.(OBSOLETE) "The purpose of this manual is to teach the soldier what he can do for himself or a fellow soldier if injury or sickness occurs when no medical officer or Medical Department soldier is nearby. Information is also given concerning the use of certain supplies which are for the purpose of helping to keep well. This field manual addresses wounds, fractures/dislocations/sprains, common emergencies and health measures, effects of severe cold and heat, measures for use in the jungle/tropics and in aircraft and tank injuries,

transportation of sick and injured, war gases, and description and uses of first-aid kits and packets.

*Electric and Hybrid Cars*  
Createspace Independent Publishing Platform  
Lemon-Aid Used Cars and Trucks 20102011 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years of production. This book offers an exposé gas consumption lies, a do-it-yourself service manual, an archive of service bulletins granting free repairs, and more.

**Kurdish Armour Against ISIS** Macmillan

Schizophrenia is one of the most complex and puzzling diseases to affect mankind. It is the most common of the severe mental illnesses (psychoses) with an estimated prevalence of 0.5 - 1% in the general population and accounts for a very large portion of the day to day workload of the average psychiatrist. 50% of long-term psychiatric patients in mental hospitals are schizophrenic. There is a great deal of controversy about the causes, diagnosis and treatment of

---

schizophrenia with the consequence that a huge amount of research is carried out in the field by psychiatrists, psychologists, neuroscientists and pharmacologists. For the average practising psychiatrist seeing schizophrenics on a regular basis, making sense of the vast body of information on the subject and filtering out what is of clinical relevance can be very difficult. There is a constant stream of new drugs emerging and the new generation of drugs (the so-called atypicals) is very effective, but often expensive. The Editors (one American and one British) are both highly respected clinical psychiatrists who are probably the leading experts on schizophrenia from their respective countries and jointly have published almost 150 papers on the subject. They have brought together a strong group of contributors from the USA, UK and Europe to produce what will be an essential reference for the trainee and practising psychiatrist. The book consists of four sections; descriptive

aspects, causative aspects, physical treatments and psychological/behavioural/social treatments. There will be discussion of the theoretical controversies over symptomatology, classification and aetiology, the relationship of schizophrenia to the other psychoses, the significance of positive and negative symptoms and pre-morbid personality. There will be chapters on organic models of schizophrenia, neurodevelopmental, genetic and structural studies and the role of high-expressed emotion. The final section will cover social and environmental treatment, the role of the families of schizophrenics and the psychoanalytical therapies. There is a new chapter on the patient's perspective written by a former patient.

**Handbook of Individual Differences in Social Behavior** Dundurn  
TRB Special Report 254 - Managing Speed: Review of Current Practices for Setting and Enforcing Speed Limits reviews practices for setting and enforcing speed limits on all types of roads and provides guidance to state and local governments on appropriate methods of setting speed

limits and related enforcement strategies. Following an executive summary, the report is presented in six chapters and five appendices.

*Transportation in an Aging Society* Bloomsbury Publishing  
"The results of the MacArthur Foundation Study of Aging in America, which show how to maintain optimum physical and mental strength throughout later life." --Dust jacket.
