In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.

Learn to program SAS by example! Learning SAS by Example, A Programmer ' s Guide, Second Edition, teaches SAS programming from very basic concepts to more advanced topics. Because most programmers prefer examples rather than reference-type syntax, this book uses short examples to explain each topic. The second edition has brought this classic book on SAS programming up to the latest SAS version, with new chapters that cover topics such as PROC SGPLOT and Perl regular expressions. This book belongs on the shelf (or e-book reader) of anyone who programs in SAS, from those with little programming experience who want to learn SAS to intermediate and even advanced SAS programmers who want to learn new techniques or identify new ways to accomplish existing tasks. In an instructive and conversational tone, author Ron Cody clearly explains each programming technique and then illustrates it with one or more real-life examples, followed by a detailed description of how the program works. The text is divided into four major sections: Getting Started, DATA Step Processing, Presenting and Summarizing Your Data, and Advanced Topics. Subjects addressed include Reading data from external sources Learning details of DATA step programming Subsetting and combining SAS

data sets Understanding SAS functions and working with arrays
Creating reports with PROC REPORT and PROC TABULATE
Getting started with the SAS macro language Leveraging PROC
SQL Generating high-quality graphics Using advanced features of
user-defined formats and informats Restructuring SAS data sets
Working with multiple observations per subject Getting started
with Perl regular expressions You can test your knowledge and
hone your skills by solving the problems at the end of each chapter.

of the highly collectable XJS series of coupes, cabriolets and
convertibles with particular emphasis on quality evaluation,
maintenance and upgrades. Jaguar XJS takes the reader through the
20-year history of a model series which, after a lukewarm reception
in 1975 by Jaguar enthusiasts who expected a replacement for the
famed E-Type, matured through many evolutions into some of the
most stylish cars ever to wear the Jaguar badge, earning along the
way an enviable reputation on the international motor racing
scene.

Chemical Thermodynamics for Industry presents the latest
developments in applied thermodynamics and highlights the role of
thermodynamics in the chemical industry. Written by leading experts in
the field, Chemical Thermodynamics for Industry covers the latest
developments in traditional areas such as calorimetry, microcalorimetry,
transport properties, crystallization, adsorption, electrolyte systems and

transport fuels, It highlights newly established areas such as multiphase
modeling, reactive distillation, non-equilibrium thermodynamics and
spectro-calorimetry. It also explores new ways of treating old
technologies as well as new and potentially important areas such as ionic
liquids, new materials, ab-initia quantum chemistry, nano-particles,
polymer recycling, clathrates and the economic value of applied
thermodynamics. This book is aimed not only at those working in a
specific area of chemical thermodynamics but also at the general chemist,
the prospective researcher and those involved in funding chemical
research.

This book tells the story of how John Egan gradually overcame the odds
and, piece by piece, rebuilt this great company, winning over the
workforce, the overseas dealers and, most important of all, the
customers. Working with Margaret Thatcher and her Government,
Egan and his team of managers overcame every obstacle, every set-back,
every challenge. Again and again, it looked impossible. Yet using
innovative techniques, intelligence, eloquence, openness, motor racing
and much more, they saved this most charismatic company which has
created some of the finest and most loved motor cars of all time.It is an
amazing story that will appeal equally to car enthusiasts, those in
business and readers interested in social history.
