As soon as there were automobiles, there was racing. The first recorded race, an over road event from Paris to Rouen, France, was organized by the French newspaper Le Petit Journal in 1894. Seeing an opportunity for a similar event, Hermann H. Kohlsaat--publisher of the Chicago Times-Herald--sponsored what was hailed as the "Race of the Century," a 54-mile race from Chicago's Jackson Park to Evanston, Illinois, and back. Frank Duryea won in a time of 10 hours and 23 minutes, of which 7 hours and 53 minutes were actually spent on the road. Race cars and competition have progressed continuously since that time, and today's 200 mph races bear little resemblance to the event Duryea won. This work traces American auto racing through the 20th century, covering its significant milestones, developments and personalities. Subjects included are: Bill Elliott, dirt track racing, board track racing, Henry Ford, Grand Prix races, Dale Earnhardt, the Vanderbilt Cup, Bill France, Gordon Bennett, the Indianapolis Motor Speedway, the Mercer, the Stutz, Duesenberg, Frank Lockhart, drag racing, the Trans Am, Paul Newman, vintage racing, land speed records, Al Unser, Wilbur Shaw, the Corvette, the Cobra, Richard Petty, NASCAR, Can Am, Mickey Thompson, Roger Penske, Mario Andretti, Jeff Gordon, and Formula One. Through interviews with participants and track records, this text shows where, when and how racing changed. It describes the growth of each different form of auto racing as well as the people and technologies that made it ever faster.

F1 Mavericks is the story of the grandest, most influential, and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro.

The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and

meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham "fan" suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.

The Lovecraftian Singularity has descended upon the world in The Labyrinth Index, beginning an exciting new story arc in Charles Stross' Hugo Award-winning Laundry Files series! Since she was promoted to the head of the Lords Select Committee on Sanguinary Affairs, every workday for Mhari Murphy has been a nightmare. It doesn't help that her boss, the new Prime Minister of Britain, is a manipulative and deceptive pain in the butt. But what else can she expect when working under the thumb of none other than the elder god N'yar Lat-Hotep a.k.a the Creeping Chaos? Mhari's most recent assignment takes her and a ragtag team of former Laundry agents across the pond into the depths of North America. The United States president has gone missing. Not that Americans are alarmed. For some mysterious reason, most of the country has forgotten the executive branch even exists. Perhaps it has to do with the Nazgûl currently occupying the government and attempting to summon Cthulhu. It's now up to Mhari and her team to race against the Nazgûl's vampire-manned dragnet to find and, for his own protection, kidnap the president. Who knew an egomaniacal, malevolent deity would have a soft spot for international relations?

The legendary history of the pony car wars comes to life in this softcover edition of The Cars of Trans-Am Racing. The SCCA Trans-Am Racing Series launched in 1966 and was designed to showcase a new class of sporty domestic cars racing on road courses. Each major automotive manufacturer participated heavily in the Trans-Am Series, and in a few short years, it became the ultimate American automobile showdown. When the modified muscle cars of the series were seen performing well on the country's finest tracks, fans wanted a model of their own in the driveway. These "pony cars" boasted a new look and style not seen before, and their all-around performance eclipsed anything accomplished by production-based American GT cars up to that point. This softcover edition of The Cars of Trans-Am Racing is unique in that it focuses on the cars used in this legendary series. These vintage Mustangs, Camaros, Challengers, Barracudas, Firebirds, Cougars, and Javelins all are extremely popular with collectors and enthusiasts today. Seeing them in their "full-competition" versions when they were new will bring back many fond memories for those who were fans of this series. In addition, enthusiasts who enjoy these cars today look to the Trans-Am Series cars for styling inspiration and performance hints as part of the growing Pro Touring trend. Many of these historic cars have been restored to race-ready condition. Additional insight and interviews from the original builders and the teams that maintained the cars provide an insider's viewpoint never before seen in print.
