Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling facilities;
- strategies to select proper equipment in the early phases of a new project.

Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Polaris ATVs 250-800cc, model years 1998 through 2007. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

Scott Dixon's triumph at the Indy 500 in 2008 was the climax of a career that had played out in front of the country since he first appeared on our television sets as a 13-year-old car-racing phenomenon. Scott Dixon: A tribute to the Indy 500 legend charts Dixon's career from those early days through to this year's incredible drive at Indianapolis and his triumph in the drivers' standings in the IndyCar Series. Author John Matheson follows Dixon's career in remarkable detail from his days racing at the top New Zealand and Australian circuits through to his breakthrough in the Indy Lights in 1999 when he signed for the Johansson Motorsports team. Fly-on-the-wall coverage of Dixon's days in the USA takes the reader on a virtual race-by-race guide of his rise from the Indy Lights to the PacWest Racing team and his eventual move to the Indy Racing League. Scott Dixon: A tribute to the Indy 500 legend calls on numerous interviews with Dixon and those closest to him - including his family team-mates and team owners - to help tell his remarkable against-the-odds story of triumph in one of the world's most competitive sports. It's easy to think that Dixon - given the potential he showed as a teenager - was destined to be one of the world's great drivers. But this book smashes that theory as Matheson recounts the dark days of Dixon's career between 2004 and 2006 - including a run of 40 races without a win. Scott Dixon's

success has come in the face of much adversity and A tribute to the Indy 500 legend will leave readers convinced that Dixon is indeed one of New Zealand sport's greatest treasures.

This book is not so much about racing as it is about race people. These are the people who do the racing, or run the races, or go to races, or hang around racing, or make money from racing. They are generally lively people, sharp-edged, with-it. This is a book about the Indianapolis style of auto racing, and the story is told from the participant's point of view. **A Checkered Past** Haynes Manuals N. The 1950s and early 1960s are considered by many to be the Golden Era of Racing at the Indianapolis 500, and photographer Ben Lawrence was on hand taking photos of the Greatest Spectacle for the Indianapolis Times. During that era, Ben captured many images of the race and race events that surrounded the Indy 500. He was there when Bill Vukovich met his fate in 1955. He photographed the first Indianapolis 500 Parade, which has become an annual event. He captured A.J. Foyt winning his first race at the Brickyard. He was on hand to photograph the breaking of the 150-mph barrier. Then he saw the transition from the front-engined Offenhauser to the rear-engined Lotus-Fords, which ended the Golden Era.

Seventy-nine Short Essays on Design brings together the best of designer Michael Bierut's critical writing—serious or humorous, flattering or biting, but always on the mark. Bierut is widely considered the finest observer on design writing today. Covering topics as diverse as Twyla Tharp and ITC Garamond, Bierut's intelligent and accessible texts pull design culture into crisp focus. He touches on classics, like Massimo Vignelli and the cover of *The Catcher in the Rye*, as well as newcomers, like McSweeney's Quarterly Concern and color-coded terrorism alert levels. Along the way Nabakov's *Pale Fire*; Eero Saarinen; the paper clip; Celebration, Florida; the planet Saturn; and the ClearRx pill bottle; and paper architecture all fall under his pen. His experience as a design practitioner informs his writing and gives it truth. In *Seventy-nine Short Essays on Design*, designers and nondesigners alike can share and revel in his insights.

More than 150 drivers, fans, celebrities and others share their personal stories and remembrances of the world's most famous auto race. Twenty different race winners representing more than 40 victories are among those sharing memories, including the greatest names in the sport: Foyt, Unser, Andretti, Rutherford, Cheever, Mears, Sullivan, Rahal, Montoya, Castroneves and Kanaan. Others include Gurney, Guthrie, Goodyear, Patrick, Power, Stewart, St. James and many more. The book is as much about dreams as it is memories, from A.J. Foyt listening to the 500 in his daddy's garage as young boy, to Bev Patrick bursting into tears as her daughter, Danica, becomes the first woman to lead the 500. There is laughter and tears, triumph and tragedy, ranging from Evi Gurney hiding under a stack of sweaty driver uniforms in the back of a car so she can sneak into Gasoline Alley, to Indy's darkest days in 1964 and 1973. The memories are full of surprises and unbridled honesty. "I felt like I was at the point of an arrow that was being hurled forward by a hurricane," recalled Eddie Cheever. "It was so violent, to control it for 500 miles and finish a race, I thought would be a miracle." Fans and family have always been an integral part of making the event "The Greatest Spectacle in Racing" and both are well represented in *Indy 500 Memories*. Whether the stories are about family traditions or secretly spreading a loved one's ashes on the Speedway's grounds, they are often as personal and interesting as those of the drivers. From the first memory by Mario Andretti, to the last one of Ryan Hunter-Reay, *Indy 500 Memories* is sure to

invoke surprise, laughter, tears and awe and is a must read for any racing fan.

The legendary history of the pony car wars comes to life in this softcover edition of *The Cars of Trans-Am Racing*. The SCCA Trans-Am Racing Series launched in 1966 and was designed to showcase a new class of sporty domestic cars racing on road courses. Each major automotive manufacturer participated heavily in the Trans-Am Series, and in a few short years, it became the ultimate American automobile showdown. When the modified muscle cars of the series were seen performing well on the country's finest tracks, fans wanted a model of their own in the driveway. These "pony cars" boasted a new look and style not seen before, and their all-around performance eclipsed anything accomplished by production-based American GT cars up to that point. This softcover edition of *The Cars of Trans-Am Racing* is unique in that it focuses on the cars used in this legendary series. These vintage Mustangs, Camaros, Challengers, Barracudas, Firebirds, Cougars, and Javelins all are extremely popular with collectors and enthusiasts today. Seeing them in their "full-competition" versions when they were new will bring back many fond memories for those who were fans of this series. In addition, enthusiasts who enjoy these cars today look to the Trans-Am Series cars for styling inspiration and performance hints as part of the growing Pro Touring trend. Many of these historic cars have been restored to race-ready condition. Additional insight and interviews from the original builders and the teams that maintained the cars provide an insider's viewpoint never before seen in print.

The Naval War College has expanded its expertise in the Asia-Pacific Rim region in recent years largely in response to the growing significance of the region to U.S. national security. The College has actively hired prominent scholars and hosted a number of conferences, workshops, and guest speakers focusing on the problems and possibilities facing the Pacific Rim. South and Northeast Asia, after all, are home to some of the world's fastest-growing economies and close American allies, as well as several potential political and diplomatic flashpoints. Even more to the point, China is an ascending economic and military power both in the region and on the world stage. The U.S. Navy plays a leading role in maintaining stability in the region with its strong presence and ability to guard the freedom of navigation in vital sea lines of communication. The efforts of the Asia-Pacific Rim specialists at the Naval War College in some ways represent a case of "back to the future." One of the proudest episodes in the College's history came in the 1930s when Newport played a central role in developing the military plans necessary to cope with the ascendance of another Asian economic and military power—Japan. Although we expect that wise diplomacy and national self-interest will prevent a reoccurrence of similar difficulties in the coming decades, there is no substitute for military preparedness and well-thought-out international and regional strategies for dealing with the important region. The Naval War College Press has done its part in providing its readers with many excellent articles on regional security in Asia in the *Naval War College Review*; an important book—Jonathan Pollack, editor, *Strategic Surprise? U.S.-China Relations in the Early Twenty-first Century* (released March 2004); and now *Newport Paper 22*. Professor Lyle Goldstein of the Strategic Research Department of the College's Center for Naval Warfare Studies has been at the forefront of recent research into China's future. In this project he has guided a handful of naval officers through the puzzle of China's ongoing nuclear modernization programs. With the able assistance of Andrew Erickson, these sailor-scholars have examined various aspects of nuclear modernization from ballistic missile defense to nuclear command and control. In general the chapter tells a cautionary tale; the progress of China's nuclear modernization documented here should give pause to those inclined to dismiss China's military modernization. Steadily and with relatively little attention the People's Republic continues to improve its technologies and weapons systems. As the authors emphasize, no "Rubicon" has been crossed, but potentials are already apparent that, if realized, the U.S. Navy as now constituted would find challenging indeed.
