Eyes Behind the Lines: US Army Long-Range Reconnaissance and

Surveillance Units is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of On Point: The United States Army in Operation IRAQI FREEDOM.

Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign and suggested an assessment ought to be made about their continuing utility and means of employment. This revision contains

some important additional information the author received after this book was originally published Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical

framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

Power Boat Manual Adlard Coles

This book seeks to provide a comparative assessment of the significance of 'human factors' in effective counter-

terrorism. The phrase 'human factors' is used to describe personal relationships, individual capabilities, effective leadership, technical interface, organisational culture and the community engagement necessary to effectively minimise, counter and control the threat of terrorism. Unlike many works in the field, this book is constructed around the input of 'experienced knowledge' from over 170 semi-structured interviews of specialist military, policing, intelligence and security practitioners - those actors actually involved in countering terrorism. These practitioners come from seven countries - the United Kingdom, Ireland, France, Spain, Israel, Turkey and the United States - all of which have suffered over the years from different types of terrorist threat and responded with a mixture of counter-terrorist measures. Where military practitioners also discussed overseas counter-insurgency measures, that material has been included, since terrorism forms a key aspect of such wider insurgencies. The resulting interview data was analysed through a variant of 'Grounded Theory' to

identify key emerging themes and issues, both positive and negative, relevant to

'human factors' in the individual countries and more generically. This book incorporates the informed operational experiences and insights of the interviewees while seeking to provide examples of successful counter-terrorist measures at the strategic, operational and tactical levels. This book will be of much interest to students of counter-terrorism, defence studies and security studies in general.

The history of the American Ranger is a long and colorful saga of courage, daring, and outstanding leadership. It is a story of men whose skills in the art of fighting have seldom been surpassed. The United States Army Rangers are an elite military formation that has existed, in some form or another, since the American Revolution. A group of highly-trained and well-organized soldiers, US Army Rangers must be prepared to handle any number of dangerous, life-threatening situations at a moment's notice-and they must do so calmly and decisively. This is their handbook. Packed with down-to-earth, practical information, The Ranger Handbook contains chapters on Ranger leadership, battle drills, survival, and first aid, as well as sections on military mountaineering, aviation, waterborne missions, demolition, reconnaissance and

communications. If you want to be prepared for anything, this is the book for you.
