This terrifying selection of ghost stories brings together the very best classic works from the masters of the supernatural Phantom coaches, evil familiars, shadowy houses, spectral children and mysterious doppelgangers haunt these tales. They range from the famous, such as M. R. James's tale of an ancient curse, 'Oh, Whistle, and I'll Come To You, My Lad' and W. W. Jacobs's story of gruesome wish-fulfilment, 'The Monkey's Paw', to lesser-known masterpieces: Robert Louis Stevenson's 'Thrawn Janet', telling of a parish priest tormented for life by his encounter with the undead; Charles Dickens's unsettling account of a railway signal-man and an ominous portent; and Edward Bulwer Lytton's 'The Haunted and the Haunters', where a cursed house harbours a diabolical secret. Michael Newton's introduction discusses why ghost stories scare us and why they flourished from the mid-nineteenth to early-twentieth century, examining their changing conventions throughout history. This edition also includes further reading, notes, a glossary and a chronology. Edited with an introduction and notes by Michael Newton

A Brookings Institution Press and Ash Center for Democratic Governance and Innovation publication The Innovations in American Government Awards Program began in 1985 with a grant from the Ford Foundation to the Kennedy School of Government at Harvard to conduct a program of awards for innovations in state and local government. The foundation's objective was ambitious and, in an era of "government is the problem" rhetoric, determinedly proactive. It sought to counter declining public confidence in government by highlighting innovative and effective programs. Over twenty years later, research, recognition, and replication are the source of the program's continuing influence and its vitality. What is the future of government innovation? How can innovation enhance the quality of life for citizens and strengthen democratic governance? Innovations in Government: Research, Recognition, and Replication answers these questions by presenting a comprehensive approach to advancing the practice and study of innovation in government. The authors discuss new research on innovation, explore the impact of several programs that recognize innovation, and consider challenges to the replication of innovations. Contributors include Eugene Bardach (University of California – Berkeley), Robert Behn (Harvard University), John D. Donahue (Harvard University), Marta Ferreira Santos Farah (Center for Public Administration and Government, Fundação Getúlio Vargas), Archon Fung (Harvard University), Jean Hartley (University of Warwick), Steven Kelman (Harvard University), Gowher Rizvi (Ash Institute for Democratic Governance and Innovation, Harvard University), Peter Spink (Center for Public Administration and Government, Fundação Getúlio Vargas), and Jonathan Walters (Governing). **Nostradamus and His Prophecies** Haynes Manuals N. Once in a while a product line comes along that offers men and women the opportunity to truly reclaim the youthful face they thought they had lost forever. Without drugs, electricity or anything harmful or hurtful millions of people worldwide have successfully and reliably used exercise to trim, lift and tone sagging muscles. Just like muscles in the body can be exercised, the facial muscles can greatly benefit from exercise but not just any exercise will do. Contortions, twists, puckers and funny faces will not shape or contour sagging facial muscles in a mature face. The Facial Magic facial exercise system will lift, tone and tighten sagging facial muscles. These proven, easy-to-execute isometric movements require only minutes a day to perform and most users say they look 5, 10 even 15 years younger in just weeks as eyelids tighten, eye brows lift, the forehead smoothes, jowls and pouches melt away as double chins lessen, dramatically revealing a sculpted jaw line. Facial Magic provides the look of a face lift without surgery, seams or risk of infection. Using

only the thumbs and fingers while wearing special exercise gloves, your "age erasers" will produce immediate lifting and tightening of the facial features. In about three weeks the appearance of fine lines and wrinkles become less apparent as the muscles plump up the skin helping the user's face look refreshed, radiant and younger. This book contains all 18 Facial Magic exercises. Learn two exercises each week - each exercise requires 35 seconds - so in just minutes a day you will feel and see the youthful results you desire.

This substantially revised and expanded new edition of the bestselling textbook, addresses the difficulties that can arise with the mathematics that underpins the study of symmetry, and acknowledges that group theory can be a complex concept for students to grasp. Written in a clear, concise manner, the author introduces a series of programmes that help students learn at their own pace and enable them to understand the subject fully. Readers are taken through a series of carefully constructed exercises, designed to simplify the mathematics and give them a full understanding of how this relates to the chemistry. This second edition contains a new chapter on the projection operator method. This is used to calculate the form of the normal modes of vibration of a molecule and the normalised wave functions of hybrid orbitals or molecular orbitals. The features of this book include: \* A concise, gentle introduction to symmetry and group theory \* Takes a programmed learning approach \* New material on projection operators, and the calculation of normal modes of vibration and normalised wave functions of orbitals This book is suitable for all students of chemistry taking a first course in symmetry and group theory.

The relationship between military leaders and political leaders has always been a complicated one, especially in times of war. When the chips are down, who should run the show -- the politicians or the generals? In Supreme Command, Eliot Cohen examines four great democratic war statesmen -- Abraham Lincoln, Georges Clemenceau, Winston Churchill, and David Ben-Gurion -- to reveal the surprising answer: the politicians. Great statesmen do not turn their wars over to their generals, and then stay out of their way. Great statesmen make better generals of their generals. They question and drive their military men, and at key times they overrule their advice. The generals may think they know how to win, but the statesmen are the ones who see the big picture. Lincoln, Clemenceau, Churchill, and Ben-Gurion led four very different kinds of democracy, under the most difficult circumstances imaginable. They came from four very different backgrounds -- backwoods lawyer, dueling French doctor, rogue aristocrat, and impoverished Jewish socialist. Yet they faced similar challenges, not least the possibility that their conduct of the war could bring about their fall from power. Each exhibited mastery of detail and fascination with technology. All four were great learners, who studied war as if it were their own profession, and in many ways mastered it as well as did their generals. All found themselves locked in conflict with military men. All four triumphed. Military men often dismiss politicians as meddlers, doves, or naifs. Yet military men make mistakes. The art of a great leader is to push his subordinates to achieve great things. The lessons of the book apply not just to President Bush and other world leaders in the war on terrorism, but to anyone who faces extreme adversity at the head of a free organization -- including leaders and managers throughout the corporate world. The lessons of Supreme Command will be immediately apparent to all managers and leaders, as well as students of history.
