AC Maintenance & Repair Manual for Diesel Engines R. R. Bowker
Let us endeavor to see things as they are, and then enquire whether we ought to complain. Whether to see life as it is, will give us much consolation, I know not; but the consolation which is drawn from truth if any there be, is solid and durable: that which may be derived from error, must be, like its original, fallacious and fugitive. Samuel Johnson, Letter to Bennet Langton (1758) Attorneys and clients make hundreds of decisions in every litigation case. From initially deciding which attorney to retain to deciding which witnesses to call at trial, from deciding whether to file a complaint to deciding whether to appeal a verdict, attorneys and clients make multiple, critical decisions about strategies, costs, arguments, valuations, evidence and negotiations. Once made, these decisions are scrutinized by an opponent intent on exploiting the consequences of any mistake. In this intense and adversarial arena, decision-making errors often are transparent, irreversible and dispositive, wielding the power to bankrupt clients and dissolve law firms. Although attorneys and clients may regard sound decision making as incidental to effective lawyering, sound decision making actually is the essence of effective lawyering. An attorney's knowledge, intelligence and experience are inert resources until the attorney decides how to deploy those skills to serve the client's interests. Those decisions, in turn, largely determine a case's course and outcome.

This book will serve as a primer for both laboratory and field scientists who are shaping the emerging field of molecular epidemiology. Molecular epidemiology utilizes the same paradigm as traditional epidemiology but uses biological markers to identify exposure, disease or susceptibility. Schulte and Perera present the epidemiologic methods pertinent to biological markers. The book is also designed to enumerate the considerations necessary for valid field research and provide a resource on the salient and subtle features of biological indicators.
