Expanded for the occasion of ZZ Top's 50th anniversary, Billy F Gibbons: Rock + Roll Gearhead throws wide Gibbons' garage and studio doors for an exclusive look at his exquisite collection of cars and guitars. Love cars, guitars, and ZZ Top?

This visually stunning tour through this Grade-A Texas gearhead's weird, wild life, vintage and way-out custom guitars, and influential hot rods and custom cars is mandatory education. From the near-mythical '59 Les Paul sunburst known as "Pearly Gates" and the "Furry One" of MTV renown to cars like the Eliminator, CadZilla, and Kopperhed, they're all here—more than 60 guitars and 15 astounding vehicles, all expounded upon by BFG himself and shown in

commissioned color and artistic black-and-white photography. Cars and guitars that have made their way to light since the book's first publication in 2005 are included: Cars: Mexican Blackbird 1958 Thunderbird Quintana '50 Ford Custom Camino Grocery-Getter custom Whiskey Runner '34 Ford Coupe '51 Willys Wagon Guitars: Party Peelers John Bolin Customs Neiman Marcus BFG SG Nacho Telecaster John Bolin "Think Buck" T-style Mexican Blackbird solidbody Mojo Maker Tone Bender Zemaitis custom Marconi Lab Guitar 1929 Dixie Ukelele 1939 Rickenbacker Frying Pan ...and more! While BFG's cars 'n' guitars are the stuff of legend, no less intriguing are the tales behind his incredible music career. From teenage Houston garage rocker to the Rock and Roll Hall of Fame, the whole story is between these covers, told in the Good Reverend Willie G's own words and illustrated with photos and memorabilia from his personal archive. As with many rockers, Billy F Gibbons' jones for hot rods and customs is the stuff of legend. But beyond this bona fide bluesman's mastery of the six-string and unrepentant love for internal combustion is a noted collector whose own designs have manifested themselves in hundreds of mind-bending cars and guitars. This is the definitive and official record of that genius.

Originally published to great acclaim in 2006, Dr. Stephen Olvey's memoir Rapid Response makes a long-awaited return to

print – complete with new text and an afterword by Dario Franchitti – at the same time as the release of a documentary feature film of the same title. This book is the compelling story of the author's often tragic, sometimes funny, and frequently frustrating journey through the volatile world of professional motorsports. Along the way, he introduces many of the characters – geniuses, good guys, bad guys – that he has encountered during his quest to save lives and make motorsports safer. Among the racing legends with whom Dr. Olvey has worked – and who have their places in this book – are Mario Andretti, Emerson Fittipaldi, A.J. Foyt, Graham Hill, Nigel Mansell, Rick Mears and Al Unser Jr. Dr. Olvey attended his first race, the 1955 Indianapolis 500, at the impressionable age of 11, and saw his favourite driver, Bill Vukovich, killed in a fiery crash while leading. He began working at the famous Indianapolis Motor Speedway while attending medical school, making his first professional appearance there in 1966, when his first on-track rescue involved Graham Hill in his rookie year. Dr. Olvey organised the first traveling medical team in motorsports and was eventually joined by long-time colleague and friend, Dr. Terry Trammell. Continuing to work together over several decades, Dr. Olvey and Dr. Trammell have used their study of the cause and effect of racing crashes and injuries to make significant advances in safety, with many lives saved and serious injuries avoided. The writer of the foreword is Alex Zanardi, whose life Dr. Olvey helped to save after a violent accident in Germany in 2001, and who subsequently returned not only to motorsports, but also to handcycling, becoming a three-time Paralympic gold medalist.

Research into the manufacture of lightweight automobiles is driven by the need to reduce fuel consumption to preserve dwindling hydrocarbon resources without compromising other attributes such as safety, performance, recyclability and cost. Materials, design and manufacturing for lightweight vehicles will make it easier for engineers to not only learn about the materials being considered for lightweight automobiles, but also to compare their characteristics and properties. Part one discusses materials for lightweight automotive structures with chapters on advanced steels for lightweight automotive structures, aluminium alloys, magnesium alloys for lightweight powertrains and automotive structures, thermoplastics and thermoplastic matrix composites and thermoset matrix composites for lightweight automotive structures. Part two reviews manufacturing and design of lightweight automotive structures covering topics such as manufacturing processes for light alloys, joining for lightweight vehicles, recycling and lifecycle issues and crashworthiness design for lightweight vehicles. With its distinguished editor and renowned team of contributors, Materials, design and manufacturing for lightweight vehicles is a standard reference for practicing engineers involved in the design and material selection for motor vehicle bodies and

components as well as material scientists, environmental scientists, policy makers, car companies and automotive component manufacturers. Provides a comprehensive analysis of the materials being used for the manufacture of lightweight vehicles whilst comparing characteristics and properties Examines crashworthiness design issues for lightweight vehicles and further emphasises the development of lightweight vehicles without compromising safety considerations and performance Explores the manufacturing process for light alloys including metal forming processes for automotive applications [Scorcher](#) by Tim Ross Porter Press

Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

The racing world held its collective breath in 2001 when Alex Zanardi lost both his legs in a horrifying accident at the Lausitzring in Germany. The racing world held its breath again 19 months later while witnessing his incredible return to racing. In Alex Zanardi - My Sweetest Victory Zanardi takes us from his childhood in Italy through his hard-fought racing success to the moving story of perseverance and love that motivated his recovery. Along the way, Zanardi presents the triumphs and setbacks in his racing career, culminating in back-to-back CART

championships for 1997 and 1998. In riveting detail, Zanardi relates his terrible accident, the long path to recovery and his return to Lausitzring to complete the 13 laps he didn't finish in 2001. Alex Zanardi - My Sweetest Victory is an inspiring book about how personal strength and passion can triumph over even the most challenging circumstances -- an autobiography whose significance extends far beyond the world of motorsports.

Being a gearhead matters. Much as we love reading about the latest hypercar or money-no-object custom project, we believe vehicles owned - and loved - by gearheads like us are just as meaningful, if not moreso. Our readers are self-made. We buy vehicles for specific reasons and we learn how to maintain, modify, and repair them ourselves. (With a little help from our friends, of course!) Everyone you meet in an issue of Gearbox Magazine is cool. If you spotted them in a parking lot, you could walk right up to them and strike up a conversation. And chances are you might end up lifelong friends. We're not looking to get rich and forget our roots. We're trying to make a few bucks so we can spend more time helping gearheads build high performance machines & lives. This issue isn't perfect, but neither are our daily drivers. We hope you'll grab a copy and tell a couple friends about us. Thanks for checking us out. GBXM-united. Better living through busted knuckles.

This is the thrilling, warts-engine-oil-and-all autobiography of the only racing driver Ayrton Senna ever feared - the 200mph flawed genius of Tommy Byrne. It tells the surreal tale of a poverty-stricken Dundalk kid's rise to become the only racing driver the great Ayrton Senna ever feared - and how it all went wrong from there. For a brief moment Tommy Byrne was arguably the world's greatest driver, the motor racing equivalent of George Best and Muhammad Ali rolled into one - A racer, a thief, a raconteur. This is the story of his improbable escape, his rapid rise and his spectacular and bizarre fall from grace. Peppered with dark humour and a cast of ridiculous characters, it is the antithesis of a fairytale

- and it's all true. Hold on tight, the tale of Tommy Byrne is quite a ride - from fending for himself as the runt of a big Catholic litter in the '60s, running the gauntlet of the sectarian violence in the '70s, troubling Ayrton Senna and making it to F1 in the '80s, resorting to drugs in the aftermath and driving for a deluded billionaire madman and then gun-toting Mexicans in the '90s. It's raw, passionate, and - with Byrne's ability to tell it like it is - not for the faint-hearted.

Unmanned ground vehicles (UGV) are expected to play a key role in the Army's Objective Force structure. These UGVs would be used for weapons platforms, logistics carriers, and reconnaissance, surveillance, and target acquisition among other things. To examine aspects of the Army's UGV program, assess technology readiness, and identify key issues in implementing UGV systems, among other questions, the Deputy Assistant Secretary of the Army for Research and Technology asked the National Research Council (NRC) to conduct a study of UGV technologies. This report discusses UGV operational requirements, current development efforts, and technology integration and roadmaps to the future. Key recommendations are presented addressing technical content, time lines, and milestones for the UGV efforts.
