In *The Wild Irish Girl*, the powerful Irish heroine's marriage to a heroic Englishman symbolizes the Anglo-Irish novelist Lady Morgan's re-imagining of the relationship between Ireland and Britain and between men and women. Using this most influential of pro-union novels as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps out the genealogy of this development, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s. Tracy's model enables him to elaborate the ways in which gender ideals are specifically contested in fiction, the discourses of political debate and social reform, and the popular press, for the purpose of defining not only the place of the Irish in the union with Great Britain, but the nature of Britishness itself.

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass* *The American Yawp* is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. *The Yawp* highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, *The American Yawp* incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and

Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Metal matrix composites are making tangible inroads into the "real" world of engineering. They are used in engineering components such as brake rotors, aircraft parts, combustion engines, and heat sinks for electronic systems. Yet, outside a relatively limited circle of specialists, these materials are mostly unknown. Designers do not as a rule think of using these materials, in part because access to information is difficult as these materials have not really entered engineering handbooks. Metal Matrix Composites in Industry is thus useful to engineers who wish to gain introductory knowledge of these materials and who want to know where "to find" them.

Additionally, it provides researchers and academics with a survey of current industrial activity in this area of technology.

Cars 3: Taken By Storm Springer Science & Business Media

The Arthur of the North is the first book-length study of the Arthurian literature that was translated from French and Latin into Old Norse-Icelandic in the thirteenth century, which has been preserved mostly in Icelandic manuscripts, and which in early modern times inspired the composition of narrative poems and chapbooks in Denmark, Iceland, and Norway, chiefly of the Tristan legend. The importation of Arthurian literature in the North, primarily French romances and lais, is indebted largely to the efforts of King Hákon Hákonarson (r. 1217 – 63) of Norway, who commissioned the translation of Thomas de Bretagne's Tristan in 1226 and subsequently several Arthurian romances by Chrétien de Troyes and a number of Breton lais. The translations are unique in that the French metrical narratives were rendered in prose, the traditional form of narrative in the North. Only one work was translated into verse in Norway, namely Chrétien de Troyes's Yvain, which was commissioned by Queen Eufemia (d. 1312), the German wife of the Norwegian king Hákon Magnússon (r. 1299 – 1319), and which is the only Arthurian romance in Old Swedish. The earliest Arthurian texts to have been translated antedate King Hákon's program of translation, however. The Prophetiae Merlini in Geoffrey of Monmouth's Historia regum Britanniae were rendered by the Icelandic monk Gunnlaugr Leifsson in Merlínússpá, around the year 1200. Presumably at the same time, or a little later, Geoffrey's Historia was also translated in Iceland and entitled Breta sögur. The book concludes with a chapter on Arthurian literature in the Rus' area, precisely East Slavic, with a focus on the Belarusian Trysnan.
