An award-winning scientist offers his unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might

turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ’ s sassy kids show him the limits of his

profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ’ ll be laughing and learning at the same time.

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."-Observer (UK)
If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to

question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists—the apostles of the freemarket—have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity—and wit—in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works—and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

The CB PLL Data Book Haynes Manuals N. America, Incorporated

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed" (Bill Gates, "Top 5 Books of the Year"). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who *The Financial Times* said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis

focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

The new Dodge Charger,
Challenger, and other LX-
platform cars bring modern
V-8 performance to
unparalleled heights, and the
new Challenger and Charger
Hellcats are the most
powerful American production
cars today. The outrageous
performance and audacious
styling has earned a large
and dedicated following.
However, you can tune and
modify the Chrysler 300,
Dodge Magnum, Charger, and
Challenger for more
performance, and for many
owners, fast is not fast
enough. In the pursuit of a
higher-performing LX-platform
car, former Mopar Muscle
editor Randy Bolig has

created this book to show you
how to extract ultimate
performance from these cars.
Chrysler has built more than
one million Chargers,
Challengers, and other full-
size-platform cars starting
with the Dodge Magnum and
Chrysler 300. These cars
offer competent handling,
braking, and suspension
performance, but they can be
made much better through a
set of targeted upgrades
using better aftermarket
equipment. Bolig gives you a
comprehensive guide to the
cars and engines. He details
the features, benefits, and
drawbacks of each package or
set of upgrades, so you
select the best modification
for your car, application,
and budget. He also covers
basic to extreme
modifications for the R/T and
SRT8 models with the 5.7-
6.1-, and 6.4-liter Hemi

engines. Guidance for
installing heads, rotating
assemblies, ignition
upgrades, higher-performance
injectors, and many other
parts are provided. But, this
book doesn't just discuss
performance; it shows you how
to do it with comprehensive,
step-by-step product installs
for a cat-back exhaust
system, hand-held ignition
tuner, cold-air intake, and
supercharger. If you have
been searching for the best
performance package to make
your Charger, Challenger, or
full-size Chrysler car stand
out from the crowd, you need
this book. It has the latest
information, so you can learn
how to install all the
products and get your car
back out on the road.
