The small Evolution engine permanently replaced the Ironhead engine,
and as of November 2010, is still being produced by the Harley-
Davidson motorcycle company. It can be found in Harley-Davidson's
883, 1100 and 1200 XLH Sportster models. The larger Evolution
engine, however, was replaced by the Twin Cam 88 engine in 1999.

The Evolution (Evo) engine is a V-twin engine that has been manufactured by Harley-Davidson since 1984 for a variety of different motorcycle models. The engine design is often credited with saving Harley-Davidson from bankruptcy after the management buyout and subsequent reorganization that the company went through during the early 1980s.

Cylinder Heads Harley Davidson new parts, Never pay retail ...

The Evolution engine is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles. It was made in the 1,340 cc displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last EVO was placed in a production factory custom FXR4. In 1999, it was replaced by the Harley-Davidson Twin Cam 88 in the Touring and Dyna model and in 2000 in the Softail models. Also available in the Sportster model beginning i

Replacement and Crate Engines | Harley-Davidson USA

They made a reliable coast-to-coast engine. In the Big Twin models, the Evolution engine was offered only in the 82ci size. This displacement provided more than enough power and torque for HD's bigger bikes. Horsepower increased 10% and torque

increased 15% from the Shovelhead. Also part of the engine redesign was better lubrication and a reliable ignition system. Many Shovel owners reverted their ignition back to points because it was more reliable.

engine and engine cooling: engine: 10/23/2001 - woodland hills, ca all 1999 harley davidson "twin cam" engines were equipped with faulty cam bearings which were changed during the 2000 model year.
