Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win†? situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience

building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

A band of savage thirteen-year-old boys reject the adult world as illusory, hypocritical, and sentimental, and train themselves in a brutal callousness they call 'objectivity'. When the mother of one of them begins an affair with a ship's officer, he and his friends idealise the

man at first; but it is not long before they conclude that he is in fact soft and romantic. They regard this disillusionment as an act of betrayal on his part - and the retribution is deliberate and horrifying.

This book contains the papers presented at the International Joint Conference on Mechanics, Design Engineering and Advanced Manufacturing (JCM 2018), held on 20-22 June 2018 in Cartagena, Spain. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and nautical, aeronautics and aerospace design and modeling. The book is divided into six main sections, reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work; they are also intended to stimulate new research directions,

advanced applications of the methods discussed, and future interdisciplinary collaborations.

A "sensual, brutal . . . ambitious, dazzling, disturbing, and memorable" retelling of Jason and the Argonauts seen through the eyes of Medea (Financial Times). International bestselling and multi-prize-winning author David Vann transports readers to the Mediterranean and Black Sea, 3,250 years ago, for "[a] stunning depiction of one of mythology's most complex characters" (The Australian). It is thirteenth century BC, and the Argo is bound for its

epic return journey across the Black Sea from Persia's Colchis with the valiant Jason, the equally heroic Argonauts, and the treasured symbol of kingship, the Golden Fleece. Aboard as well is Medea, semi-divine priestess, and a believer in power, not gods. Having fled her father, and butchered her brother, she is embarking on a conquest of her own. Rejected for her gender, Medea is hungry for revenge, and to right the egregious fate of being born a woman in a world ruled by men. In Bright Air Black, "David Vann blow[s] away all the elegance and toga-clad politeness . . . around our idea of ancient Greece . . . to reveal the bare bones of the Archaic period in all their bloody, reeking nastiness (The Times, London), and to deliver a bracing alternative to the

long-held notions of Medea as monster or sorceress. We witness Medea's humanity, her Bronze Age roots and position in Greek society, her love affair with Jason, the cataclysmic repercussions of betrayal, and the drive of an impassioned woman-victim, survivor, and ultimately, agent of her own destiny. The most intimate and corporal version of Medea's story ever told, Bright Air Black "a compelling study of human nature stripped to its most elemental" (The Guardian).

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gitars Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway,

using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
